# You're Invited

Please join us for one of our community open houses to learn about the BECI 765-kV Transmission Line Project.

Hello,

You are receiving this letter because you are a stakeholder, own property or live near a potential preliminary power line route option for the Midcontinent Grid Solutions (MGS) BECI 765-kV Transmission line project. The project is in its early stages and we are evaluating routing options. No final route has been selected at this time.

The BECI project is an approximately 190-mile, 765-kV project in Wisconsin connecting electric facilities in Crawford County with facilities in Walworth County before continuing to the state line. The exact connection point at the state line has not been determined because the connecting transmission line in Illinois is under development by another utility.

The BECI project is designed to strengthen the power grid, improve reliability and enable the flow of low-cost energy to customers in Wisconsin and the Upper Midwest. It is part of a broader regional plan developed and approved by the Midcontinent Independent System Operator (MISO) to ensure the grid is reliable and efficient.

In early 2026, MISO selected MGS through a competitive bidding process to build and maintain the new transmission line. MGS pulls together the expertise and experience of Transource Energy—a joint venture of American Electric Power and Evergy—and BHE Transmission. With more than 100 years of industry experience, these companies operate more than 84,000 miles of transmission lines across the country, delivering the infrastructure that keeps power flowing safely and reliably to customers.

We are hosting our first round of eight public open houses later this month. That's where we'll share project information and gather valuable routing input. Detailed maps will be available for review and comment at the open houses. A virtual open house and online comment card and map showing the study segments are available at [mgs-projects.com/BECI](https://mgs-projects.com/BECI). **We are asking for public feedback on the study segments by September 7, 2026.** Your participation in this process is an important step in helping us make more prudent, informed decisions as we plan and build a project that benefits Wisconsin and the Upper Midwest.

Following the open houses and public comment period, our team will continue to evaluate information, review public feedback and identify preliminary routes to share at future public open houses later this fall. MGS plans to file an application for a Certificate of Public Convenience and Necessity with the Public Service Commission of Wisconsin in early 2027. Enclosed with this letter is additional information about the project, along with a map showing the preliminary route options.

Sincerely,

**Virginia Limmiatis**
