ATTENTION RESIDENTS

TDS is building a high-speed, all-fiber internet network to serve Village of Reeseville homes and businesses. As construction continues, residents may see activity in their area or in the public utility easements at their property.

Like other utility companies, TDS has the right to work in the public right-of-way and utility easements, including those that may be in your front, side, or backyard. TDS respects your property and will exercise caution in all areas of your yard. Crews will attempt to notify you by knocking on your door or leaving a note to let you know we will be entering your yard. Following the completion of construction, a separate cleanup and restoration crew will come to the site to repair any disrupted areas.

Should residents have any questions or concerns, please call TDS' construction hotline at 855-259-8576.

For more on TDS' services, visit TDSTelecom.com. You can also find further information on easements on the construction section of TDS' website.

Saving for Retirement: Are You Guessing or Planning?

Let's say you dream of spending your retirement mornings on a warm beach, coffee in hand, waves rolling in. To get there, you had a simple plan: save \$1 million and buy the beach house you always wanted.

But when retirement arrives, reality hits. After accounting for keeping your current home, everyday expenses and health care, \$1 million doesn't stretch as far as you thought, and the beach house remains a dream. The problem wasn't your discipline – it was that your number was never really your number. It was arbitrary, not anchored to what your ideal retirement would actually cost.

How can you make sure your retirement number is right for you?

A solid savings goal starts with a clear picture of the retirement you want. Think through where you plan to live, whether you'll keep your current home or downsize, how much you plan to travel, if you'll help children and grandchildren financially and what health care might cost you later in life. Build a realistic monthly budget, then multiply by 12 months to find your annual need. Adjust this amount for inflation until the first year of retirement.

Then, multiply that figure by 25 to get a sense of how much may be needed to save. It's a formula based on the idea of withdrawing 4% annually from your savings, assuming you retire in your mid-60s. If you need \$60,000 a year, your target is around \$1.5 million. You may need more or less depending on your lifestyle, health, unexpected expenses, Social Security benefits and other income. No single rate or strategy will work for everyone. A financial advisor can help you determine your number and strategy.

Once you know your target, the path forward becomes clearer. Here are a few tips for next steps:

Start early. The sooner you begin saving, the more time compound interest has to work in your favor. Small amounts set aside automatically each paycheck have the opportunity to grow significantly over decades.

Live below your means. Spending less than you earn is one of the most powerful wealth-building habits. When your income rises, save and invest the difference instead of upgrading your lifestyle.

Keep your debt under control. Since credit cards and other high-interest debt can slow your progress, pay off balances monthly when possible.

Invest consistently. If your employer offers a 401(k), aim to contribute at least 10%-15% of your salary, and increase your contributions after every raise. If you max out your 401(k), a traditional IRA or Roth IRA may offer additional tax-advantaged growth (eligibility and contribution limits apply).

Boost your income when you can. Develop new skills, ask for a raise or explore a side income. Every extra dollar saved moves you closer to your goal.

The difference between a retirement you love and one full of compromises often comes down to the planning you do today. Know your real number, build a solid plan and get the right help along the way.
