Re: Street and Utility improvements
Village of Reedsville

Dear Property Owner or Resident:

The Village of Reedsville has hired Ayres Associates to oversee installation of new watermain, sanitary sewer, storm sewer, and roadway reconstruction taking place over the next 2 years. This letter is to introduce you to the Ayres Associates staff and provide project information. We should be your first call for questions or special needs that may arise during construction. Please call Craig Schuh at 920.366.0970 or Tony Depies at 920.241.1392. Ayres will have field staff on site as well. The field staff can be approached with questions, but please do it in a safe manner when in the construction area. If you are not able to reach any of us with those numbers, during regular business hours, you can also call our Green Bay area office at 920.498.1200 and the receptionist will assist you or help you get in contact with us. In addition, the Village sewer and water contact is Justin Meijer at 920.207.8214.

The prime contractor for the project is Jossart Brothers, Inc. and Jason Hermsen is the contractor's project manager and can be reached at 920.371.0819. The onsite crew foreman can also be approached if a problem or concern arises, but please do so in a safe manner.

Work is scheduled to begin the week of July 13th and will start on 2nd St at Manitowoc St with the sanitary sewer, water main and then connection to the homes/businesses. Storm sewer will follow before moving to Mill St. with the same construction sequence. It is likely that a second sewer and water crew will begin on Menasha St. before work can start on 3rd St.

The goal of the Village and contractor is to complete the project as quickly as possible and minimize the inconvenience to all users. Streets will remain as accessible as possible during construction but we will keep the project closed to through traffic. In the immediate area where the contractor is working, no vehicular traffic will be allowed for the safety of the contractor and public. Access to all properties will be restored when the contractor completes their work, and driveway access is restored. When streets are completely blocked off, or the contractor is working, please find an alternate route to your destination. If this prevents access to your property you will be notified in advance.

We would like to thank you in advance, for your patience during this construction season.

Sincerely,

Ayres Associates Inc
