

10-4-2-d

(6)(d) **Culvert Construction Standards.**

- (1) **Size.** All driveways, whether temporary or permanent, are required to have culverts as determined by Town Board. This includes, but is not limited to temporary roads, i.e. construction sites, logging trails, etc. Culverts shall be installed prior to construction work being commenced on the property. Culvert size shall be determined by the Town Board. All culverts shall be constructed of galvanized steel, plastic, or reinforced concrete, and shall be of new manufacture, unless specifically excepted by the Town Engineer.
