Cass County Environmental Services  
Courthouse Box 3000  
Walker, MN 56484

- I. DESCRIPTION:** The system provides wastewater treatment for eight houses adjacent to Little Boy Lake. The system consists of 8 -1500-gallon septic tanks which flow to a duplex pumped 750 gallon lift tank that pumps to a 1500 stilling tank that gravity feeds 1,120 lineal feet of three foot wide rock trenches with 18 inches of rock.
- II. PERFORMANCE REQUIREMENTS:** During the period beginning on the effective date of this permit and lasting until this permit's expiration date, the Permittee is authorized to discharge treated water from this system to the groundwater. No discharge from the system to surface water nor overland flow from any of the system components is permitted. The maximum of an average seven-day daily flow can't be more than 75% of 1800 est. gallons.
- This discharge shall be limited by the Permittee as specified below:

PARAMETER	DAILY	MONTH	SAMPLE FREQUENCY	SAMPLE LOCATION	SAMPLE TYPE
<b>Water volumes</b>	Max 75% 1800 gpd	July	Weekly	Pump - Event Counter	GPD Measured Per Acceptable Industry Standards
<b>Spring Inspection:</b>					
Septic Tanks		April	Annual	Septic Tanks	Fill out Form 5-2
Pump Tank		April	Annual	Pump Tank	Fill out Form 6-1
Stilling Tank		April	Annual	Stilling Tank	Fill out Form 5-2
<b>Fall Inspections:</b>					
Drain field Insp.		October	Annual	Soil Treatment Area	Fill out Form 8-1, Questions 2&4
Pump tank Insp.		October	Annual	Pump tank	Fill out Form 6-1, Questions 2,4f & Form 5-2 Question 5
Stilling Tank Insp.		October	Annual	Stilling Tank	Fill out Form 5-2 Questions 2,6a

### III. A. MAINTENANCE REQUIREMENTS:

PARAMETER	LOCATION	FREQUENCY
Septage removal	All Septic Tanks	As Needed- when Scum and Sludge levels reach 25% accumulations (document measurements)
Effluent Removal and Backwashed	Pump Tanks	Sludge level is 25% from inlet of pump to bottom of tank (document measurements)
Effluent, Scum, Sludge removal	Stilling tank	As Needed-when Scum and Sludge levels reach 25% accumulations (assuming tank has baffles), document measurements

### III. B. MAINTENANCE RECOMMENDATIONS

PARAMETER	LOCATION	FREQUENCY
Hydraulic loading	Drain field	Shut off lines when hydraulically loaded if following conditions met: <ol style="list-style-type: none"> <li>1) if valves are present</li> <li>2) total square footage of remaining drainfield is adequate to sustain maximum daily flow</li> <li>3) conditions exist to warrant action under Form# 8-1 question 4 In the professional opinion of service provider</li> </ol>

#### **IV. SCHEDULE OF COMPLIANCE**

12/31/2022 or if system fails, system must be operated as a holding tank.

Apply for renewal of permit by 12/1/2022

#### **V. REPORTING REQUIREMENTS:**

Report annually with requirements of the operating permit to Cass County Environmental Services by January 1 of each year.

Cass County Environmental Services

Courthouse, Box 3000

Walker, MN 56484

The monitoring reports shall be signed by the owner. Copies are to be retained for your records.

Sampling and laboratory testing procedures, if required, shall be performed in accordance with Standard Methods.

#### **VI. NONCOMPLIANCE**

##### Permit Violation

Within 24 hours of becoming aware of a permit violation that may endanger human health or the environment, the Permittee shall notify the Cass County Environmental Services at (218) 547-7243. The Permittee shall submit a written description of the violation and a written plan to bring the system into compliance to Cass County Environmental Services within five days of discovery. Cass County Environmental Services shall review the plan and provide a date and conditions by which the system is required to be restored.

##### Operational Emergency

Cass County Environmental Services shall be notified at (218) 547-7243 in the event that the Permittee determines that immediate operational assistance is needed. The Permittee shall provide all pertinent information regarding the emergency. If a life-threatening situation exists, the Permittee shall first call 911.

##### Remedial Action

The Permittee shall take all reasonable steps to minimize the adverse impacts to human health, public drinking water supplies, or the environment resulting from a permit violation, or discharges of oil, toxic pollutants, or hazardous substances.

##### Written Reports

The Permittee shall include with the next monitoring report a written report describing any permit violation(s) that occurred during the reporting period. The report shall describe the discharge, including volume, duration, effluent characteristics, and location.
