Driveway will have access to STH _____ CTH _____ TOWN ROAD _____

Proposed Land Use of Property _____

*****Provide a site plan sketch, on the back of this application, indicating proposed driveway location, including width and length of driveway. Only one driveway allowed per parcel. Permit is issued by Town Building Inspector.*****

Culverts for access driveways from town roads leading to parcels of land in the town shall be purchased by the property owner. The culvert size shall be determined by the Building Permits, Driveways and Culverts Committee of the town and culverts shall not be less than fifteen (15) inches in diameter. The contractor placing the culvert must furnish a minimum of five (5) yards of road gravel upon placing the culvert. Culverts must be made of steel or plastic construction and end walls shall be required on all driveway culverts. A minimum of thirty (30) inches of cover is required over plastic culverts. No concrete may be poured within six (6) feet of the edge of the paved town road. The driveway within the area of the public right-of-way shall slope away for at least four (4) feet from the town road at a minimum of 1% and maximum of 5% to prevent erosion on the town road.

An application fee of \$55.00 is required to be submitted by the applicant at the time of driveway approval by the issuing Town Building Inspector. Maintenance of the driveway shall be the responsibility of the applicant and/or property owner.
