

We are currently making improvements to Rockdale's water system. The 250,000-gallon Ground Level Storage Tank project will construct a new water storage tank at 200 South Midland Avenue. These improvements are being made as part of a series of improvements to Rockdale's water system. Once complete, it will be used to store water from the proposed Well No. 8 and associated Water Treatment Plant. Funding for this project was partially provided by a low-interest loan from the Illinois Environmental Protection Agency's Drinking Water State Revolving Loan Fund (SRF). The SRF program is funded by both state and federal sources. The \$1,423,891.75 loan has an interest rate of 1.00% and will be repaid over 30 years. For more information, please contact Village Hall.
