Town of Vernon
Wind Energy Potential

Prime Wind Energy Resource
- generally adequate wind resources and no identified constraints (i.e., no "known" and no "possible" constraints)

Secondary Wind Energy Resource
- generally adequate wind resources and no "known" constraints, but at least one "possible" constraint

"known" and "possible" constraints are identified by the VT Public Service Department in their Act 174 Energy Planning Standards

Note: prime vs. secondary wind energy resource is NOT based on wind speed.

- Existing Small Wind
- Existing Commercial Wind
- Commercial Wind In Development

No existing wind energy generation in this area.

Existing wind from the Vermont Energy Atlas, developed from Certificates of Public Good. They may correspond to the address of the certificate holder and not the actual location of the installation.
