**Observations:**  
 Good catch of fish. Lots of fish up shallow. Some bass on nests near downed wood, bluegills no beds.  
 High wind churned up the eastern shore making it hard to see fish, but this shore is mostly sand and cabins.  
 Few bass were on beds, mostly near downed wood. Missed quite a few more bass with rookie netters.  
 Best fish habitat is along the National Forest Shoreline. Bluegills were concentrated shallow but no beds seen.
