TO WHOM IT MAY CONCERN:

This letter is to provide information on the potential installation of a radio transmitter that may be installed in the Town of Rutland. This radio transmitter would consume 2600 watts of electricity. The key word is consume power and not generate power. Therefore, our customers can rest assured that this installation would not cause any stray voltage issues.

If you need additional information, please feel free to contact me.

A handwritten signature in blue ink that reads "Donna T. Bradley".
