

The Life Cycle of a Butterfly

Butterflies go through several changes in their life cycle. Firstly, they start as an egg. Secondly, the egg hatches into a caterpillar. Thirdly, the caterpillar eats and grows for about two weeks. Fourthly, it turns into a chrysalis. Fifthly, the chrysalis slowly turns into a butterfly. Finally, the butterfly comes out of the chrysalis and flies away.

1. What does a butterfly start as?

2. How long does the caterpillar eat and grow for?

3. What does the chrysalis turn into?

4. How long does it take for the chrysalis to turn into a butterfly?

5. What happens when the butterfly comes out of the chrysalis?
