

# Know what's going on with your business... as it's happening.

Business leaders used to manage their companies using periodic, retrospective reports. This reporting helped them see what mistakes had been made, what could have been more profitable, and which customers weren't paying on time. But today's innovative entrepreneurs know better.

## *Why wait for the month's end to fix what's wrong?*

With Kaufman Rossin Connect, your business intelligence dashboard shows you key performance indicators and real-time data, so you can quickly see what's working... and what needs work.

Our fully integrated, cloud accounting ecosystem uses the latest technology, with built-in security, to handle your daily processes, monthly reconciling, and year-end reporting. It's built around a robust general ledger system, with all the tools you need to manage your business in one place:

- *Payroll*
- *Workflows*
- *Time management*
- *File management*
- *Accounts receivable*
- *Accounts payable*
- *Expense reports*
- *Ongoing management reporting*

And of course, you'll have access to accounting pros who can help turn that data into action. To learn more about Kaufman Rossin Connect, and how it can transform your business, reach out to us.
