[Company ESG and Corporate Citizenship Document.pdf](#)

Indicate where in the evidence the relevant information can be found

Available on the entity's Corporate Responsibility Web Page, the ESG and Corporate Citizenship Document outlines ESG-related initiatives and achievements from 2021 and prior.

Climate/Climate Change Adaptation: Outlined within the Statement on Climate Change on page 3 and further detailed in the "Project Green" section on page 4. To help offset Kite's impact on global emissions and to assist in reforestation efforts more generally, Kite launched "Project Green" – a plan under which Kite is partnering with community organizations to plant 100 trees for each lease it executes in 2021.

Energy Consumption: Outlined within the Statement on Climate Change on page 3 and explained in the Utility Impact section, Ongoing management of utility information is guided by the entity's engagement with a third-party utility management firm that helps benchmark assets and set goals for reductions.

Greenhouse Gas Emissions: Outlined within the Statement on Climate Change on page 3 and further detailed in the "Project Green" section on page 4. To help offset Kite's impact on global emissions and to assist in reforestation efforts more generally, Kite launched "Project Green" – a plan under which Kite is partnering with community organizations to plant 100 trees for each lease it executes in 2021.

Renewable Energy: As part of the process in energy reduction, ongoing exploration of renewable energy is a procedure within the asset management team. The entity has placed solar at its shopping centers and continues to engage with developers to source new deals. There is a corporate goal in 2022 to study at least 10 roof top solar projects.

Waste Management: Evidenced by the diversion data in the Implementation section on Page 3, the entity keeps track of the waste leaving it's sites as a procedure within the asset management team. The entity engages with trash management vendors to oversee the trash program at its properties. Those vendors report on diversion and seek opportunities for increased recycling.

Water Consumption: Mitigating environmental impact statement within the Statement on Climate Change, includes the entity's efforts on water consumption. Through its engagement of the third-party utility management vendor, the entity tracks and seeks ways to reduce its water consumption. The entity is actively exploring the adoption of smart irrigation controls at several properties.

Green Leasing Program: The entity recognizes that cooperation with its Tenants is critical to understanding and improving its whole-building energy data. The entity's roll out of Green Lease language is explained on Page 4. Since then, the entity has signed leases with such language earning the entity a Gold designation from the Green Lease Leaders program.

Employee Data: The entity is required to annually file an Equal Employment Opportunity report (EEO-1) of which a blank form is attached as evidence. Employee participation in this reporting is voluntary report but it helps the entity keep track of a majority of the diversity within the employee pool. The Gender and gender pay gap are available and tracked within the entity's Human Resource Information System, part of the payroll system. Employee tenure is tracked within the employee survey.

The Board is comprised of nine members. Diversity and Gender are both quickly identified and tracked. The entity's Proxy identifies each Trustee member by name, age and tenure.

Note: This table is generated by GRESB and represents an aggregation of the data provided at the asset level. It is provided for review purposes and defines the scope of your 2022 GRESB Performance Component submission. It should reflect the total standing investments portfolio and exclude any development and/or major renovation projects, exclude vacant land, cash or other non real estate assets owned by the entity. You are not able to amend information in this table, with the exception of "% GAV" (this is because GAV is an optional field at asset level and cannot be used for aggregation). Please note that % GAV is used for entity and peer group classification and should accurately reflect the composition of the portfolio.

Ongoing risk assessments are performed by our Asset Management team using data from our energy data and waste management partners. We track all utility and most waste data at the property level and use that data to identify weaknesses or opportunities. In 2021 we obtained IREM CSP designation for 29 assets. During that process the properties were reviewed for Transportation, IAQ, Health & Well-being risks and opportunities in addition to other risks and opportunities that are covered by other processes and procedures to identify risks across the entity.

Explain the methodology used to establish the targets and communicate the anticipated pathways to achieve these targets (maximum 250 words)

In February 2021, the Compensation Committee approved targets and performance metrics to evaluate 2021 performance using a formulaic approach. In February 2022, the Compensation Committee approved short-term incentive compensation for our NEOs based on these targets and metrics.

As we progress into 2022, the Company plans to publish its inaugural corporate social responsibility report which will align with the Global Reporting Initiative (GRI) and the Task Force on Climate-related Financial Disclosures (TCFD), and will remain focused on ESG efforts and to progress towards achieving our five-year ESG goals. To further align our team with our ESG focus, various ESG metrics continue to be an increasingly important component in determining the annual bonuses of our named executive officers.

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays a summary of aggregated Data Coverages and Like-for-Like consumption changes per property type, split by Landlord Controlled and Tenant Controlled areas. While "Area - Aggregated Data coverage" only accounts for the floor area size of assets when aggregating values, "Time - Aggregated Data coverage" accounts for the period of ownership. Consequently, "Area/Time - Aggregated Data coverage" aggregates both dimensions and is used for benchmarking purposes.

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays the aggregated Renewable Energy consumed/generated per property type, either on-site or off-site, as well as the Percentage of total Consumption by category.

Provide additional context for the answer provided (not validated, for reporting purposes only)

**GHG Emissions**

## GHG emissions

Total GHG emissions of the portfolio

The indicator below is automatically populated by GRESB based on information provided through the reporting entity's GRESB Asset Portal. Participants can access the Asset Portal via the Assessment Portal menu, section ASSETS.

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays the aggregated GHG emissions values per property type, along with their related Floor Area Covered, Maximum Floor Areas and Like-for-like changes (%) in emissions.

Note: Scope 3 emissions in the GRESB Assessment are calculated as the emissions associated with tenant areas, unless they are already reported as Scope 1 or Scope 2 emissions (if they cannot be disassociated from emissions from other areas). Scope 3 emissions do not include emissions generated through the entity's operations or by its employees, transmission losses or upstream supply chain emissions.

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays a summary of aggregated Data Coverages and Like-for-Like consumption changes per property type, split by emission Scopes. While "Area - Aggregated Data coverage" only accounts for the floor area size of assets when aggregating values, "Time - Aggregated Data coverage" accounts for the period of ownership. Consequently, "Area/Time - Aggregated Data coverage" aggregates both dimensions and is used for benchmarking purposes.

Explain (a) the GHG emissions calculation standard/methodology/protocol, (b) used emission factors, (c) level of uncertainty in data accuracy, (d) source and characteristics of GHG emissions offsets (maximum 250 words).

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays a summary of aggregated Data Coverages and Like-for-Like consumption changes per property type, split by Landlord Controlled and Tenant Controlled areas. While "Area - Aggregated Data coverage" only accounts for the floor area size of assets when aggregating values, "Time - Aggregated Data coverage" accounts for the period of ownership. Consequently, "Area/Time - Aggregated Data coverage" aggregates both dimensions and is used for benchmarking purposes.
