# SCANNING TECHNOLOGY

**In a world of digitisation, dedicated scanners are quickly becoming the device of choice for offices.**

Canons scanning devices are improving the way the office is digitised by providing accessibility and intuitive technology.

These dedicated scanners offer superior features including; direct to folder scanning, improved Optical Character Recognition (OCR), automatic page orientating, automatic document separation and more.

## THE FUTURE OF SCANNING

**Canon**

# WHY USE SCANNING TECHNOLOGY?

## 1 SIMPLE AND INTUITIVE

Canon's scanning devices offer intuitive user friendly designs with automatic sorting functionality and auto file name generation features.

## 2 A RANGE OF SUPPORTED FILE FORMATS

Dedicated scanners offer a wide range of file formats including PDF, JPEG, TIFF, BMP, PNG and PowerPoint.

## 3 ENHANCED PRODUCTIVITY

Advanced feeding and diverse image processing provides active thresholds, colour dropout/enhancement, remove binder/punch hold, prevent bleed through and deskew features.

## 4 INCREASE UPTIME

With unplanned downtime identified as one of the top four negative business impacts caused by current scanning environments (Quocirca 2022) dedicated devices offer up to 60% increase in uptime for businesses.

## 5 RELIABLE VERSATILE FEEDING

Scan various document types and sizes reliably with batching functionality for mixed document types.

## 6 CONNECTIVITY

Connect to the device wired or wirelessly via the network as a scanning kiosk, or by traditional method direct to a PC via USB.

# HOW SCANNING DEVICES IMPROVE WORKFLOWS

## FOR LEGAL

Process high volumes of sensitive documents, securely.

## FOR MEDICAL

Digitise referrals, questionnaires, signed consent forms and other documents handled using paper.

## FOR ACCOUNTING

Scan application forms, copies of identification and other paper-based documents containing client information.

## FOR LOCAL GOVERNMENT

Speed up government processes and improve the quality of services by processing digitised forms.
