## **Bearded Iris**

Bearded Iris come in a myriad of colours and colour combinations.

Maintenance is minimal.

They require cold winters (the frostier the better) and in summer they love the heat.

They are not thirsty plants and are very drought tolerant.

## **Availability**

Orders open in May and will close around March, depending on stock availability.

Bulbs will only be supplied from late November to late March, to ensure Iris plants are given adequate time for multiplication and for optimum bloom.

We do not disturb them in Spring- from April to the end of the Bloom season.
