

# The Coat made for Australian Conditions

**Your top dog in fencing, Bluedog Fences, work hard to deliver quality, innovative fencing solutions with the service you'd expect from one of the top Australian manufacturers.**

[bluedogfences.com.au](http://bluedogfences.com.au)

# A note from our mate, **Post**

**By choosing a Bluedog Fence, you're supporting a home-grown Australian business that understands your job and the unique conditions you're working in. We're 100% Australian owned and operated.**

Whilst you might see just another fence, we promise you a Bluedog Fence will stand the test of time and with our 10 year colour fastness warranty look great for longer.

Like the trusty blue cattle dog, we're born of good ol' fashioned Aussie ingenuity and you can be guaranteed the real McCoy, no mongrels, when you choose a Bluedog Fence.

A Bluedog Fence will outlast the competition because we use Australian steel and a superior zinc coating compared to imported products. A Bluedog Fence is an investment in safety, security and peace of mind.

We have a large range of commercial and security fencing systems available, manufactured in regional Australia supporting local jobs and local families. We work with government agencies, commercial groups and private enterprises all over Australia.

At Bluedog Fences, we pride ourselves on our high standards, often exceeding the Australian Standard. Our team is always working hard to deliver all over Australia to meet your safety, security and compliance requirements.

Our handy team fabricate, chemically clean and powder coat wholly in-house at our state-of-the-art, Lean manufacturing facility in Tamworth, NSW.

Our innovative products including hinges and gates have been designed with strength and safety in mind, proving the loyalty and reliability of a Bluedog Fence.

Choose the fence with the coat made for Australian conditions.

**Choose a Bluedog Fence.**

# The top dogs in fencing - no bones about it.

## EXPERIENCED DOGS - A GREAT PACK TO JOIN

The Bluedog team of highly skilled and dedicated staff form an enviable culture that drives quality and excellence from our factory to the customers door.

We take pride in our local roots and commitment to the communities in which we operate. We remain firmly rooted in Tamworth, where we continue to manufacture our products and provide local jobs.

We have a highly competent and skilled team and we're passionate about attracting and retaining the best talent. At Bluedog Fences, we foster a culture of continuous learning and development while ensuring our team members embody a "can-do" attitude, reflected in the quality of our products and services.

## WE KNOW OUR BACKYARD BETTER THAN ANYONE

With Aussie ingenuity and determination, our innovative products have been designed with strength and safety in mind, and often exceed the Australian Standard. We know it best because Aussie born and bred.

We annually process and fabricate enough Australian steel to lay a line from Tamworth to Adelaide (Over 1,200km) -and we've sniffed out every scenario along the way!

We are experts in school security fencing and our team are well-trained and extremely knowledgeable in understanding state government school fencing specifications. We not only possess a deep understanding of the intricate details and regulations governing fencing in government projects but also stay up-to-date with the latest changes and developments in this field.

Our expertise goes beyond just selling products; it extends to providing invaluable guidance to government agencies and contractors. By being well-versed in the specific requirements, materials, and installation standards that different state government projects demand, we can offer tailored solutions and ensure that their customers meet the rigorous compliance standards. Ultimately, a supplier that excels in understanding government fencing specifications plays a crucial role in helping government clients make informed choices and deliver successful, code-compliant projects.

Bluedog Fences Australia offers products nationally off the shelf from our NSW, South Australia, and Queensland warehouses, or we can work with you to develop the perfect solution for your patch.

## LIKE A DOG WITH A BONE

From concept to completion, we prioritise quality, efficiency, and sustainability, ensuring our manufacturing practices align with our commitment to excellence.

Bluedog Fences Australia sources the highest quality materials in the market, strategically partnering with our suppliers to ensure a strong, consistent, and efficient supply chain to our manufacturing facility.

Our lean manufacturing facility in Tamworth NSW also houses an in-house pre-treatment and fully automated powder coating line. We are an Interpon Accredited Powder coater meaning our systems are audited on an annual basis.

We don't stop until it's done properly and our standards are extremely high -from steel sourcing, fabrication, metal pre-treatment, powder coating, packing, and warehousing we'll deliver excellence every time.

At prescribed intervals we can provide completed Inspection and Test Plans (ITP's) capturing quality checks at each stage of the process such as powder adhesion testing, and engineering certification on our standard range.

# Quality & Partnerships not just price.

## THE COAT MADE FOR AUSTRALIAN CONDITIONS

The iconic blue dog is born with a pure white coat before growing into a weather-resistant double coat and a Blue Dog Fence works from the same principles, beginning with 100% Australian raw steel before receiving a zinc coating to deliver superior protection against corrosion and rust - perfect for the land of droughts and flooding rains.

The make-up of zinc coating is a key indicator of quality in steel fencing. Without enough zinc, steel begins to rust and fail faster. Zinc coating gets attacked first as it is exposed to the elements and is designed to protect the steel.

The steel tube used in our fence panels is Z275 (19 micron thickness) and is coated on both the internal and external surface. Imported tube has a lower zinc coating mass (1-7 microns) and may only be coated externally.

## NO BITES, NO TRICKS

Our product is stronger and more durable and manufactured to relevant state government authority design specifications. All fabrication is in-house using Silicon Bronze welding for greater corrosion resistance than is achieved with 'black' mild steel weld (as often the case with imported fencing) chemical cleaning and powder coating conducted to the highest standard with a 10-year color fast warranty.

At Bluedog Fences, we believe in doing things right the first time. Our lean manufacturing process is designed to keep our whole pack working in an organised, safe and clean working environment so we can deliver the highest quality fencing products, every time. Like all good working dogs, we're dynamic, nimble and competitive - and always ready to work.

## NATURE-LOVING BLUEDOG

We live and work outdoors, so we want to do our part to keep our planet green and clean. That's why our steel tube has a 30% recycled component and is sourced directly from Orrcon Steel mills in South Australia and Queensland, with both being supplied from BlueScope Steel in New South Wales.

Using locally sourced materials is not only better for our local economy, it means we have greater visibility over manufacturing, treatment and transport standards - something we don't always know when comparing local to imported goods.

## A LOYAL PARTNER

At Bluedog Fences, we believe in going above and beyond to meet our customers' needs. We take a consultative approach, working closely with our clients to understand their unique requirements and deliver tailored solutions that exceed their expectations. Our commitment to exceptional customer service has earned us a loyal customer base and numerous industry awards.

We've grown alongside our partners by committing to the following principles:

- Establish a reputation as one of the best all round companies in the fencing industry.
- Be an honest, fair and reliable company to do business with.
- Attract, retain and develop good people and foster a good team culture.
- Continue to develop new and "smarter" fence systems, so as to provide greater value to our customers.
- Continuously improve all aspects of our business to remain highly competitive and relevant in the market.
- Set a best practice example for work, health and safety (WHS) management.

**We believe in doing things the right way. Going above and beyond to meet our customers' needs.**

# Projects

## SECURATOR®

**BAMAGA**  
FAR NORTH QUEENSLAND

Queensland Government required 3,000m of security fencing in a highly corrosive, remote location in Far North Queensland.

Due to the location and environment Bluedog Fences Australia SecuraTop® security fence was the product selected to meet the demands of this project.

## RODTOP®

**CIRCULAR QUAY**  
NEW SOUTH WALES

NSW Government required security fencing in a highly corrosive, iconic location on Sydney Harbour.

Due to the location and environment Bluedog Fences Australia RodTop® security fence was the product selected to meet the demands of this project.

## HEADINGLY®

**KAREN ROLTON OVAL**  
SOUTH AUSTRALIA

South Australian Cricket Association upgrade to Karen Rolton Oval in Adelaide CBD required high quality, low maintenance fence.

Blue dog Fences Headingly® was selected and continues to feature in many local and 1st class fixtures at the ground.

## Products

### **SECURATOP® TUBULAR SECURITY FENCING**

This product has been demonstrated to dramatically reduce the incidence of vandalism and unauthorised access to buildings and amenities.

- Powder coated tubular pre-galvanised steel.
- Crush spear top style.
- 1800mm, 2100mm & 2350mm high panel options
- Square hollow section top and bottom rail affixed with security bracket and anti-tamper fasteners.
- 25x25x1.2mm uprights at 137mm centres.
- 65x65mm square hollow section post into natural ground with steel cap.

### **SECURATOP MAX® TUBULAR SECURITY FENCING**

This heavier gauge security fence option has greater rigidity and vandal resistance for higher impact applications.

- Powder coated tubular pre-galvanised steel.
- Crush spear top style.
- 2350mm high panel
- 40x40x2mm square hollow section top and bottom rail affixed with security bracket and anti-tamper fasteners.
- 25x25x1.6mm uprights at 123mm centres.
- 65x65x2.5mm square hollow section post into natural ground with steel cap.

### **SECURATOP® CHILD & POOL SAFE TUBULAR SECURITY FENCING**

This product is recommended for applications requiring perimeter security and child-safety such as public pools, playgrounds and childcare centres.

- Powder coated tubular pre-galvanised steel.
- Crush spear top style
- 1800mm and 2100mm high panel
- 40x40x1.6mm square hollow rail affixed with security bracket and anti-tamper fasteners.
- 25x25x1.2mm uprights at 112mm centres.
- 65x65mm square hollow section post into natural ground with steel cap.

# Products

## CROWDTUFF® PLAYGROUND FENCING

This product is recommended for open space playgrounds.

- Powder coated tubular pre-galvanised steel.
- 1200mm high flat top style.
- 40x40x1.6mm square hollow section top and bottom rail affixed with security bracket and anti-tamper fasteners.
- 25x25x1.2mm square hollow section or Ø19x1.2mm upright (pool safe spacing),
- Through punched (rather than face welded) for greater strength.
- 65x65x1.6mm post with base-flange or into natural ground with steel cap.

## CROWDTUFF® LOOP TOP PEDESTRIAN FENCING

This product is recommended for pedestrian barrier fencing applications such as rail crossing, elevated footpaths, and traffic lights.

- Powder coated tubular pre-galvanised steel.
- 1200mm high loop top style.
- 40x40x1.6mm square hollow section top and bottom rail affixed with security bracket and anti-tamper fasteners.
- Ø19x1.2mm upright through punched (rather than face welded) for greater strength.
- 65x65x1.6mm post base-flanged or into natural ground with steel cap.

## TOPRAIL® POST AND RAIL FENCE SYSTEM

TopRail® is our proprietary fence system that is ideal for hobby farms, rural properties, horse studs and also livestock enclosures. It is also suitable to control pedestrian and vehicle movement around open spaces.

- 1 to 4 rail options.
- Horse safe and strong.
- Easy and quick installation.
- Readily accommodates sloped ground.
- 75x75mm post and 115x42x2mm rails.
- Screw together.

## ROLLER BARRIER

Roller Barrier can be fitted to new fencing or readily retro-fitted to new fencing on existing structures to deter and delay person scaling the fence or structure.

- 115mm diameter UV tested plastic roller cups.
- Hot dip galvanised brackets.

## Products

### **CYCSAFE® BIKE PATH SAFETY FENCING**

This product is recommended for shared use and bike paths where there are risks if cyclists are to leave the path at speed. Meets Austroads Design Guideline.

- Full barrier or partial barrier options.
- 1300mm high assembly.
- 40x40x1.6mm square hollow section top and bottom rail affixed to posts with a security bracket and vandal resistant self-drilling Tek screws.
- 25x25x1.2mm upright through punched for greater strength.
- 65x65x2mm square hollow section into natural ground (with steel cap).
- Hot dip galvanised (standard) – Powder coated pre-galvanised steel available.

### **HEADINGLY® STEEL PICKET FENCING**

This product is recommended for sports grounds and other open space areas as a heritage compliant substitute for timber picket fencing which requires considerable maintenance.

- Powder coated tubular pre-galvanised steel.
- 900mm high panel with 'moon' spear.
- 40x40x1.6mm square hollow section top and bottom rail affixed with security bracket and anti-tamper fastener.
- 75x16x1.0mm picket.
- 65x65x1.6mm into natural ground with a steel cap.

### **GUARDFORCE® 358 HIGH SECURITY FENCING**

This product is recommended for preventing unauthorised access to high value or high hazard assets.

- Steel work hot dip galvanised after fabrication.
- Mesh is made from a Australian manufactured Zinc-Alu wire that gives very good corrosion resistance.
- Finger proof/ anti-climb 358 mesh.
- 2400mm high panel with various additional toppings.
- Complies with ENA guidelines.

### **REPEL® SERRATED RAIL TOPPING**

Serrated rail can be fitted to new fencing or readily retro-fitted to new fencing or existing structures to deter and delay persons scaling the fence or structure.

- 50x50x2 equal angle rail bolted or Tek screwed to fence or structure.
- Hot dip galvanised (standard) – Powder coated pre-galvanised steel available.
