2.c. MINIMUM AGE FOR PARTICIPANTS

Both formats are open to anyone, male or female, born in October 2001 or earlier.

2.d. TOTAL AUTONOMY

Autonomy is the main rule of the race.

Total autonomy is defined as the ability to be self-sufficient throughout the race, both in terms of food (solid and liquid), clothing and safety, requiring the capacity to adapt to any problems encountered or foreseeable (bad weather, physical or mental problems, injuries, etc.), as well as bivouac, geographical orientation and possible bicycle repairs.

Total autonomy requires compliance with the following mandatory rules:

- The participant must have all his compulsory equipment with him throughout the duration of the event (see section EQUIPMENT). He must carry his equipment in his bikepacking bags, marked, at the start of the race and not exchange anything during the event. At any time, the organizer can check the bikepacking bags and its content. The participant must submit to these routine checks, under penalty of exclusion from the race.
- No outside assistance is allowed at any time of the race, under penalty of exclusion from the event.
- It is forbidden to be accompanied or to accept to be accompanied during all or part of the race by a non-participating person.
- Drafting (taking advantage of the aspiration of a rider or a vehicle) is forbidden for the participant competing in solo.
- Drafting is nevertheless allowed for team riders who sign up in a pair category. Any group consisting of more than 2 people at any time during the event will be excluded from the race.
- The participant can buy food (solid and liquid) and equipment from any shop that he physically encounters.
- The participant can sleep either at a hotel, with locals or in a bivouac while respecting - in that case - the area rules.

The participant waives on any pursuit based on the liability of the organizer in the eventuality of the cancellation of the event or modification of its date, therefore no compensation amount can be distributed.

The organizer reminds the participant of the dangers of cycling on open roads in the presence of traffic and wild animals.

Assistance between participants is not allowed (food, repairs) except for pair riders.

It is the responsibility of each participant to assist or rescue any person in danger or injury and to inform the emergency services if necessary.

The participant must be aware that the nearest hospital or medical facility may be hours from him should he suffer any injury and that there may be a lack of helicopter assistance.

The participant must be aware that in case of an accident during the event, the means of rescue or local medical means may not be sufficient.

In all cases, the organizer must be informed immediately.

7. MAXIMUM DAYS AUTHORIZED

BikingMan Portugal is an endurance event that takes place over maximum 5 days. Any racer who can't ride a minimum of 190 km per day will be disqualified.

8. ABANDON

If the participant's GPS tracker does not indicate any significant movement (more than 100 km) for 24 hours, the participant will be deemed to have scratched and will be disqualified.

In the case the participant scratches from the race, he must notify the organizer by any means and return the loaned equipment (GPS Tracker), to the race village, at his own expense, before the 27th of September 2020.

In any case, the participant will have to sign a waiver, before the race start, in order to get his GPS Tracker. The waiver will engage the participant to refund the race organizer in case of loss or damage of the GPS tracker or if the participant can't return the GPS tracker before the 27th of September 2020.

The participant will leave the race on his own and by his own means in order to return to home or any other place.

The participant, who has accepted the extreme risks of the event as set out in Article 2b of this Regulation, expressly and irrevocably relieves the organizer of any liability and assistance relating to his evacuation and / or repatriation to any place.

It is therefore strongly recommended that the participant anticipates a possible scratching to organize his / her evacuation / repatriation.

In the case of injury during the event, outside assistance, in addition to that of another participant, such as a doctor, rescuer, fireman, ambulance, hospital (etc.) is possible and recommended.

In this case, the participant must - after being treated - resume the race at the exact place where he was assisted or evacuated.

In the event of an injury during the event, the expenses resulting from the use of even exceptional means of rescue or evacuation shall be borne by the rescued participant who must also ensure his own return from the place where he has been evacuated from and even if the participant asks the organizer to call for help.

The participant must therefore have taken out an insurance covering any type of damage related to the event, as stated in article 10 below INSURANCE.

The participant may use his GPS Tracker on which an SOS function is provided, to indicate that he needs emergency services.

Any abuse, including a false alert, will be the full responsibility of the participant as well as the costs of it.

The organizer reserves the right to disqualify a participant who shows signs of advanced fatigue or serious injuries. The participant fully accepts this possibility of being taken out of the race.

However, this provision does not mean that the organizer has a role of supervision of the participant, as to his health or his physical and mental capacities.
