(koo-at)

NOTE: Disassembly is equivalent for all Transfer series racks, Transfer 2-Bike shown.

1. Rotate the rack into the trailer position.

NOTE: Ensure the pivot latch bar has fully engaged the pivot bracket before proceeding.

2. Remove the m4 scREW retaining the end cap and slide the end cap out of the rack body.

NOTE: Square nut removal is not necessary, but shown, to aid in reassembly.

3. Reinstall the end cap in the reverse order of disassembly, making sure not to overtighten any hardware.
