

Tools Needed: 4mm and 8mm Security Hex Key

# *kuat*®

1. Flip the rack over.
2. Remove the two M6 screws.
3. Loosen the cam bolt until the hitch cam is no longer attached, and pull the cam bolt assembly out of the hitch tube.
4. Remove the M6 screw holding the hitch cam in.
5. Remove the hitch cam and steel ball, out the back of the hitch tube.
6. Repeat these steps in reverse to install the new one.
