

Optional Tools Needed: Pliers

1. Open the Panel Door.
2. Firmly grip the Door Seal and pull up to begin removing the Door Seal. Pliers can be used to grip seal if needed.
3. Work the Door Seal loose along the lip of the Rear Door Extrusion. Repeat for the top and other side.
4. Press the new Door Seal along the lip of the extrusion, making sure it is fully seated. Make sure the round bulb is facing outwards.
