

Tools Needed: Scissors/Diagonal Cutters, Pliers (Optional)

1. Open the Panel Door.
2. Firmly grip the Spoiler Seal and pull up to begin removing the Spoiler Seal. Pliers can be used to grip seal if needed.
3. Work the Spoiler Seal loose along the length of the Rear Door.
4. Unroll the new Spoiler Seal and press onto the Lip of the Rear Door. Make sure the long side of the Seal is facing toward the inside.
5. Work the new Spoiler Seal along the Lip of the Rear Door making sure it is fully seated.
6. Using Scissors/Diagonal Cutters, trim the seal on either end to have a $7/8'' - 1''$ gap between the edge of the Door and Spoiler Seal.
