

**Tools Needed:**  
4mm Hex Key

**kuat**<sup>®</sup>

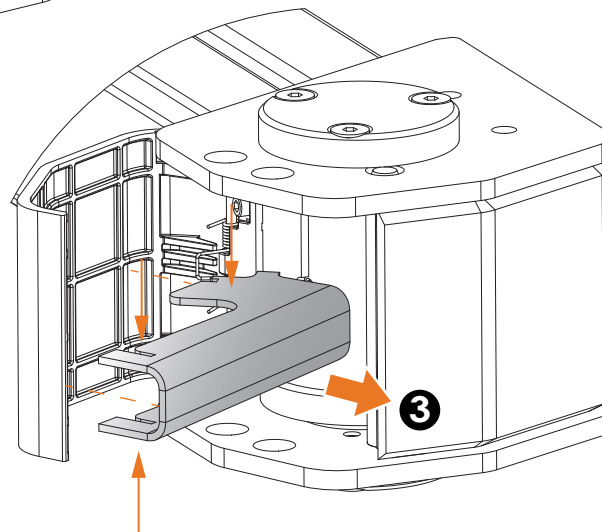

- ① Swing the Pivot Shroud open and use the 4mm Hex Key to remove the two M6 Socket Screws. The Shroud can now be removed.

- ② Install the new Pivot Shroud; **do not remove** the cardboard installation tool until after the M6 Screws are threaded. Using the 4mm Hex Key, torque the M6 Screws to 9 Nm.

- ③ Remove the cardboard installation tool.
