

I am a teacher, what is my role in Kudos?

Our goal is to streamline family connection without adding extra workload. Teachers will allocate a brief period during the day/week for students to share their posts. Through the teacher portal on the app, educators can easily oversee and monitor students' contributions. Teachers can also optionally post photos on behalf of a student (individually or in bulk) making it a super quick and easy process.

How safe and secure is Kudos for students?

Kudos is designed to provide a safe and secure environment for children to share photos of their learning with their loved ones. We've implemented robust measures to protect student privacy, with security as our top priority across every aspect of the platform. For more information, please refer to our [Privacy Policy & Terms and Conditions](#).

Our students share devices (we don't have 1:1), can both students access Kudos?

We've made it incredibly simple for students to log in and out of the Kudos app, allowing for device sharing. The app is designed to accommodate multiple student profiles on a shared device, ensuring a way for each student to engage in their learning journey independently.

When do the students share learning?

Students have the opportunity to post photos and videos from their classroom, allowing family members to celebrate their child's learning in real time. This ensures a coordinated and enriching experience where families can stay actively engaged with their child's learning journey as it unfolds.

How much does Kudos cost?

The Kudos app is entirely free for teachers, families and students to use. The service incurs a per-student cost, and this expense is covered by the school. Our goal is to provide an inclusive and accessible platform for families to celebrate their child's learning journey without any direct cost to them.

How do I log in & distribute my classes log ins?

Once your school subscribes, your login credentials will be emailed to you, along with instructions for distributing your class login details and supporting families to get involved. If you get stuck, your school administrator can resend any login details.

Who can see students account?

A student's teacher/s, family members and additional members can join a student's account on Kudos. However, for safety and privacy reasons, only the administration family members can determine which family members can access their child's account. This ensures a secure and controlled environment for sharing and celebrating the child's learning journey.

Can my class view each others learning feeds?

No, only your child's teacher and admin family members can view your child's learning on Kudos.
