

# ANNOUNCING:

## ENHANCED LOAD TENDERING AND PAYABLE PROCEDURES

### Dear Valued Carrier,

We are pleased to announce the implementation of Epay Manager, an advanced load tendering and freight payment system. With Epay, your company will be given the first opportunity to view our available loads and communicate your interest in hauling our freight. After freight is awarded and delivered, you'll no longer need to create and mail invoices or proof of delivery documents. This online system eliminates the time invoices and checks spend in the mail, by invoicing electronically and directly depositing payments into your bank account. With this system your company will have easier access to available loads and will receive payments faster.

### Epay Manager provides the following features and benefits:

- » User Friendly Interface
- » Web Based, No Software Required
- » Electronic Load Tendering
- » Electronic Invoicing and Tracking
- » Reduce Processing Costs
- » Faster Pay with Multiple Payment Options
- » Direct Deposit
- » Eliminates Mail
- » Automated Document Imaging
- » Dynamic Reporting Tools

Please register your company as an Epay member so that we may begin tendering loads and directing payments to you electronically. Getting started is easy and requires no investment or commitment. To view a video demonstration and register for our system, please visit <http://www.epaymanager.com/demonstration.html>

**Please register with Epay Manager prior to:**
