A large lecture hall with many students seated at desks, facing a stage with a screen. The text "Our problem statement" is overlaid on the left side of the image.

# Our problem statement

# Why AI Job Interview Assistant is required?

# How does AI interview work?

- The process requires candidates to record themselves answering the questions and submit the algorithmic analysis of their words and even facial tics.

## How it works?

- ❑ Upload your CV or Resume
- ❑ Share the prospective Company, Role you are interviewing for
- ❑ Then paste the company URL in website

Search

# Let's get started!!!!

- ❑ Introduction questions will be asked according to user's Resume
- ❑ Tell about the time when you solved the problem and record the answer
- ❑ then Results appear on the screen

A woman with glasses is shown in profile, looking thoughtful with her hand on her chin. She is in an office environment with a laptop and papers visible. The background is blurred, showing other people working.

**HOW DO WE OPTIMISE  
THE MODEL?**

A woman with glasses is looking at a laptop screen in an office setting. The image is dimly lit, with the woman's face and the laptop screen being the primary light sources. The background is blurred, showing other people in the office.

## ADVANTAGES :

- ❑ Build confidence level and you will less stressed
- ❑ Save time and fill the position faster
- ❑ Enhance the candidate experience and employer brand

**How we made it**

**A working demo of our  
project**

THANK YOU
