

Let us tell you about  
our project.

*by Ivan Glushenkov, Maxim Sokolov, Julia Kotovich  
and OpenAI*

Let us tell you about  
~~our project.~~  
**our clients!**

p.s. those are very **productive, high-earning and competent**  
people!

## Documentation-heavy Businesses, Coders, HR people, Open source projects

- save up to 10h/week of onboarding-related communication
- save up to 3h/day of dumb scrolling and searching time
- help employees to focus on tasks not answers

with one click  
using Documentation AI  
paying on-consumption plans !

# Documentation AI

**Earn answers small-talking** with your knowledge base or documentation instead of scrolling, searching or asking highly-paid senior people.

*by Ivan Glushenkov, Maxim Sokolov, Julia Kotovich  
and OpenAI*

# Documentation AI

**Code project documentation**

**PDF documents**

# How does it work?

Enter your Github repository clone link

`https://github.com/UKPLab/sentence-transformers.git`

51/100

Done!

Your question about repository:

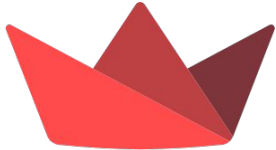

What is it

10/100

What is it

possible to do with SentenceTransformers? It is possible to use SentenceTransformers to generate embeddings for each input sentence, compare sentence similarities using cosine similarity, and train your own sentence embeddings models for various use-cases. Additionally, it is possible to find over 500 sentence-transformer models on the Hugging Face Hub, which come with an automatically generated model card, metadata tags, an interactive widget, and an Inference API. It is also possible to share your SentenceTransformers models on the Hub by calling the `save_to_hub` method from a trained model.

Let it talk about herself...

Demo.

# Sales & Marketing

Cold e-mailing with Apollo :)

Industries – medtech, it, manufactures

Roles – Head of IT, senior dev, HR BP

## Chat with your documentation using AI.

Hey, we're helping documentation-heavy projects to save employee time and focus on tasks with one click.

Documentation AI — gpt3-based robot that allows you to chat with your knowledge base or documentation instead of scrolling, searching or asking highly-paid senior people.

Usually it  
+ saves up to 3h/day of dumb scrolling and searching time  
+ saves up to 10h/week of onboarding-related communication  
+ helps to focus employees on tasks not answers

Does it resonate? (yes/no)

Are you available next week to chat for 15 minutes? I'd love to see if we can help you out in any way!

06:56

# Future features

Integration with Github

Authentication

Project library for each user

Plugins for different IDEs

# Thank you!
