Create AI Images

Create logos, wallpapers and more through Artificial Intelligence

Login/Sign up

**Create images just
describing what you
want.**

Image creation problem

Only for few

Only people with design knowledge can create quality images as expected.

Technologies not enough

Some web platforms that facilitate the process do not allow customization thanks to AI.

Welcome to Synapse Image

With Synapse Image, you can create icons, wallpapers and more just by describing what you want the image to contain.

In a few minutes, you can generate and download the images. We are adding more and more options and functions all the time.

Login or create your account

Icons

Posters

Wallpapers

**Generate customizable images
according to what you want.**

Facilitates the design process by delivering images
according to certain characteristics entered.

How works?

User enters the description of what he wants (content, quantity of images, type of image and size)

Synapse Image verifies the data, verifies that the user has available credits and generates the image thanks to DALL-E 2

User receives the images and can open or download them.

Technologies: DALL-E 2, .NET (C#) and Microsoft Azure

Business model

Model

Credits that can be acquired for each image generation action.

Users

SMEs with the need to create images for advertising, web and others.

Competitors

👉 Clickable

Generate ads in seconds with AI

Beautiful, brand-consistent, and highly converting ads for all marketing channels. No design experience needed.
