RecommendAI

Show recommendations made with AI

Problem: have you ever spent a considerable amount of time scrolling endlessly on your favorite streaming platform to decide which show watch next?

What about that feeling of emptiness pervading your body when you finished a show that you loved?

What about the intrusive thought asking “what if I start a new show and I don’t like it?”

Technologies:

ChatGPT python client + FastAPI (backend)

NextJS + TailwindCSS (frontend
