# Existing Problem

In today's digital age, information is more accessible than ever before. The advent of the internet has made it possible to access information on virtually any topic from anywhere in the world.

However with the vast amount of information available today, searching for specific information on a particular topic can be time-consuming.

# Focusing on Academic Research Papers

Academic research papers can be dense and technical, which can make it time-consuming to extract the required information, especially when the **purpose for reading** varies from person to person.

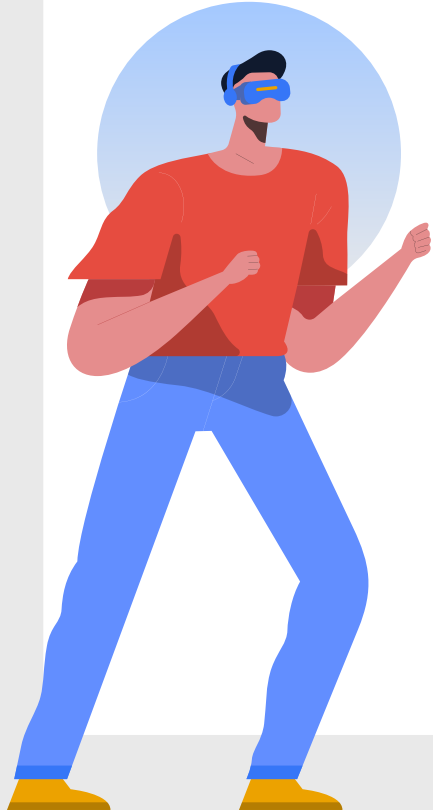

# It's all about the purpose...

How easy if we can summarize a paper according to our requirement AKA **purpose?**

Introducing...

**Paper.**  
**Summ**

# How?

## Step 1

### **Input the URL**

Upload the URL of your research paper

---

## Step 2

### **Choose your Keyword**

Paper.Summ needs your keyword

---

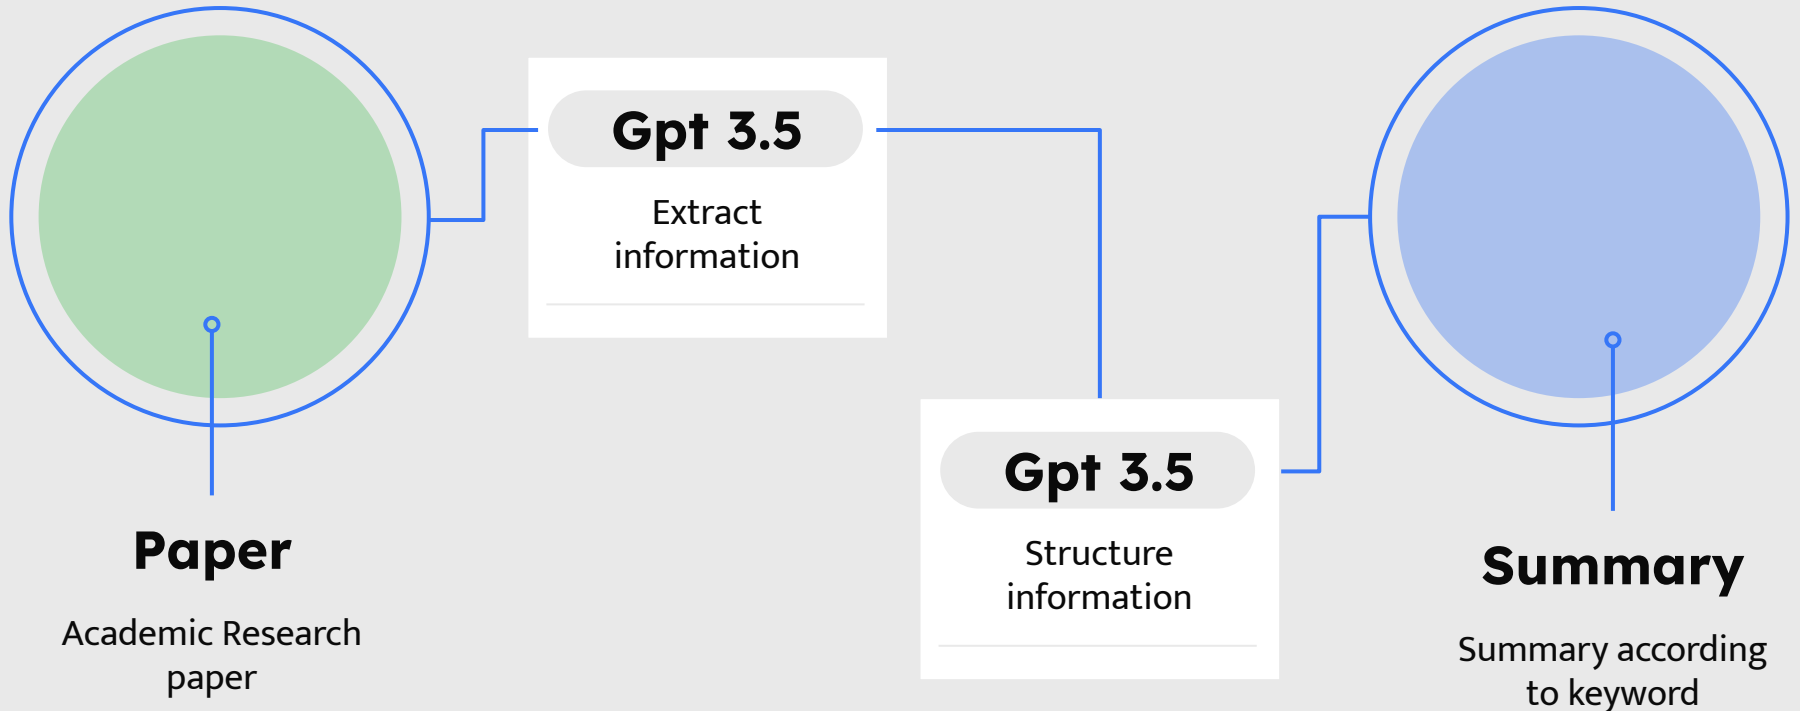

## Step 3

### **Just wait few seconds**

How depth of Summary you need

---

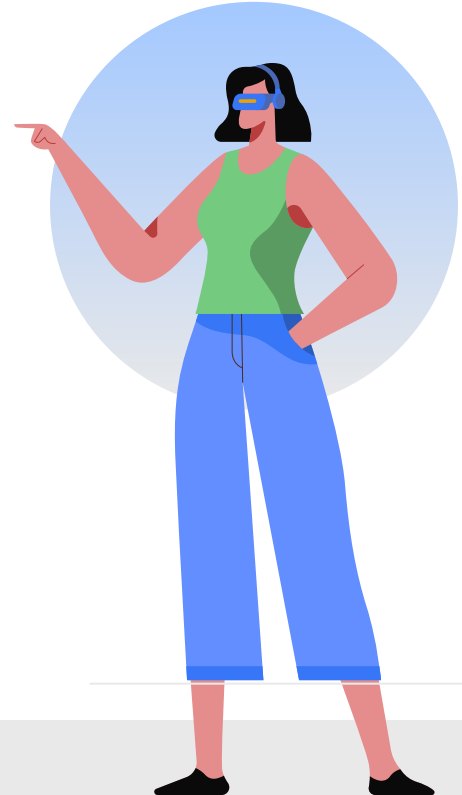

# Pipeline

# It's Demo Time...

**Paper.  
Summ**

## Next Steps ...

**Paper.**  
**Summ**

# Thank You!

**Paper.  
Summ**
