#### **Background**

# Reading with children has positive impact on their early development

- Help with developing language and literacy skills
- Boost creativity and imagination
- Foster development of important cognitive and social skills (i.e. problem-solving, critical thinking) as well as specific interests (e.g. science, technology, etc).

### Background

#### **Problem Statement**

Hard to find many stories that fit the specific interests of your kid while following your requirements as a parent.

#### Solution

MetaBooks allows parents to generate personalized stories for their kids with just a few clicks!

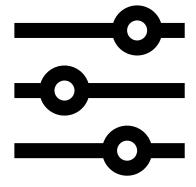

Once upon a time, there lived a sly fox and a curious cat in the same forest.

#### **Benefits**

Educational value

**Personalization** 

Convenience

#### **Product**

#### How does it work?

Front-end:

#### Step 1:

Select your requirements for the story (e.g. characters, location, context, style, etc.). Step 2:
Click 'generate'.

#### Step 3:

Enjoy your personalized illustrated story with your kid!

Back-end:

#### Step 1:

Creation of a title and story through GPT-3 based on the request's parameters.

#### Step 2:

Extraction of characters and descriptions (from each sentence).

#### Step 3:

Creation of a prompt based on characters and descriptions in step 2, as well as the requested style.

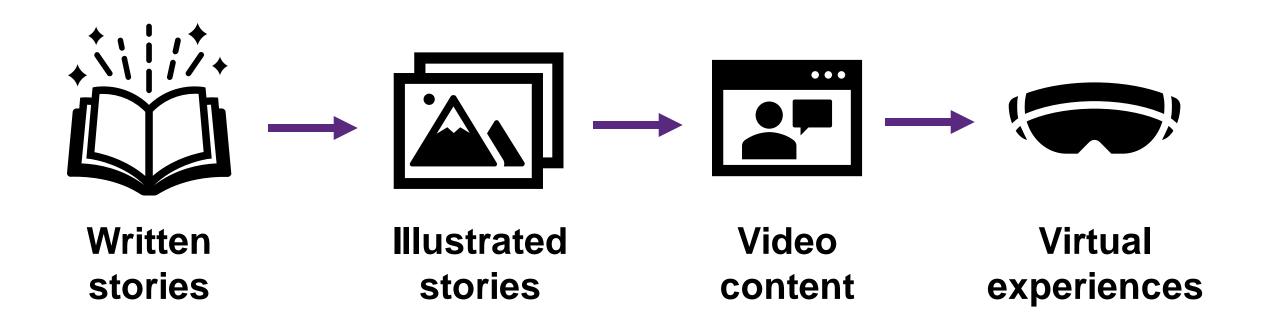

#### Step 4:

Generation of images from the prompt in step 3 through Dalle-2.
