# Virtual Assistants Platform with Open Al Models

Your personal virtual assistant: the future of efficiency and convenience.

## Market data

25%

of companies will incorporate virtual assistants into their customer service teams during 2023, according to a report by Gartner

69%

of consumers believe that virtual assistants can improve the customer experience in banking and financial services, according to a survey by Capgemini.

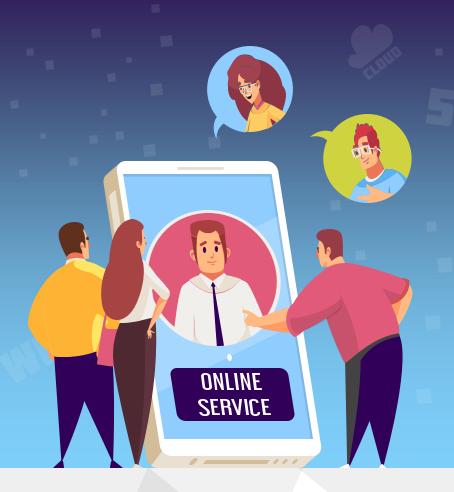

77%

of consumers expect companies to use technologies like virtual assistants to enhance the customer experience, according to a study by Salesforce

# Optimize your online service

Through our platform, create your virtual assistant with the best artificial intelligence models on the market and train them without the need for programming knowledge.

# Improve your efficiency and productivity

By answering questions automatically, the workload for customer service personnel is reduced and response times for users of your website are improved.

# **Cost savings**

A Juniper Research study predicts that virtual assistants will save businesses more than USD \$11 billion annually in customer service costs by 2023

Additionally, virtual assistants can reduce customer service costs by 30% according to a BI Intelligence report.

## Artificial Intelligence at your hands

Our solutions are based on the best artificial intelligence models on the market

#### **Business Model**

#### Our Proposal

- Easy-to-use and customizable virtual assistant creation platform
- Integration of artificial intelligence technology to offer more advanced solutions
- Data analysis and performance reports to measure the performance of virtual assistants

# Our Clients

• Companies that want to improve the quality of customer service, reduce costs, automate processes and that want to improve efficiency and productivity.

#### Service Plans

• Pay-per-use model: the platform allows users to pay only for what they use. The model is based on the number of interactions the virtual assistant has with customers, which allows users to pay for the actual use of the virtual assistant.

### Service Plans

#### Freemium
