

An abstract graphic consisting of several overlapping, wavy, ribbon-like shapes. The colors transition from a deep magenta on the left, through a dark blue in the center, to a vibrant green on the right. The shapes have a slight 3D effect with highlights and shadows, giving them a sense of depth and movement. They are set against a plain, light gray background.

# EPilot

Copilot for your emails

# The Problem

- Knowledge workers spend many hours on emails
- 90% of email content are jargons and information that can be retrieved
- Can we use generative AI?

# The Problem

- Gmail autocomplete exists -> not very good
- Context switching between ChatGPT and Gmail takes too time
- Want to instantly respond to emails in One Tab with Generative AI?
- Introducing EPilot

# Solution

Chrome extension

Uses the power of the ChatGPT via the newly configured API combined with the native speed of in-tab fetching.

Similar to Github Copilot, extension will suggest an email prompt from ChatGPT API

Able to be written by simply pressing the CTRL key

Able to be overwritten by typing anything other than the prompt

### McGill AI x IBM Office Visit

**Bonnie Li**

to me

8:26 PM (5 minutes ago) ☆ ↶ ⋮

Hey Aidan,

Hope you're doing well!

Just wanted to confirm that the office tour will be happening on Feb 23<sup>rd</sup> from 3 to 4pm. I have booked the room and consultants have volunteered to network with the students. All I need is the list of participating students so that security can grant them access to the office.

Kind Regards,  
Bonnie
