λόγος

Your personal knowledge base assistant

What's someone's knowledge base?

"We are what we read ..."

What's someone's knowledge base?

"We are what we read ..."

... but also what we watch, listen, and conversate

How to integrate and query all that information?

- What was that interesting book I read about bonobos, again?

- This podcast discussion reminds me of Schumpeter's arguments on technology, I would like to summarize and compare them.

- I wanted to list the main topics throughout all online articles and youtube videos I watched about Thailand in the past year.

Logos is here to assist you!

Logos in action!

λόγος

Logos tech stack

- **Dash** for the frontend (React) and backend (Flask)

- **Cohere** API for the multi-language embeddings

- **Qdrant** for the vector search engine

- **OpenAI** API for the multi-language generation

- **LangChain** for building the expert agent

Logos target market

- Students, from basic school to PhD

- Researchers, content writers and other information-heavy professionals

- Literature enthusiasts, History aficionados, Philosophy devotees

- Anyone really!

- Universities, Schools, Libraries, Websites

- Reference management systems (Mendeley, Endnote, Zotero, …)
