

# Mentorship application with AI mentor

# The idea

Mentorship application that leverages the power of AI and offers an innovative learning experience with OpenAI GPT-4 as the mentor in interactive educational courses

# The project

The application generates full educational online courses on various topics with video lectures

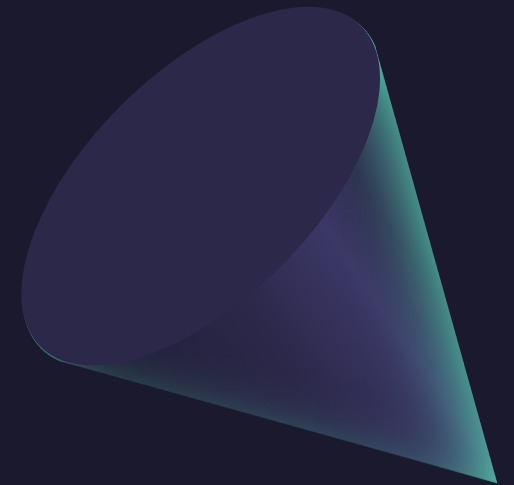

The mentor that leads the course is powered by GPT-4 AI technology and Synthesia AI generates the educational videos

The simple gamification process engages students in the learning

The AI mentor provides personalized feedback to improve student's understanding

At the end of the course, the AI mentor test the student's knowledge with generated questions

# Workflow

# Technologies used

OpenAI GPT-4

Synthesia

.NET

React

Thank you!
