## Problem at Hand

People with dyslexia often find it hard to read and write, primarily because it's **“hard for them to mentally lock in”** as described by the person suffering from Dyslexia.

## Hope for a Solution

It is seen that in most cases people with this condition find it **easier to read on electronic devices** rather than the real document itself.

# Solution

**01.**

## Read Better

Electronic Device might assist reading, but some words might be difficult.

**02.**

## Write Better

Dyslexic people often use a 3rd party ASR service to help them write.

**03.**

## Assisted Writing

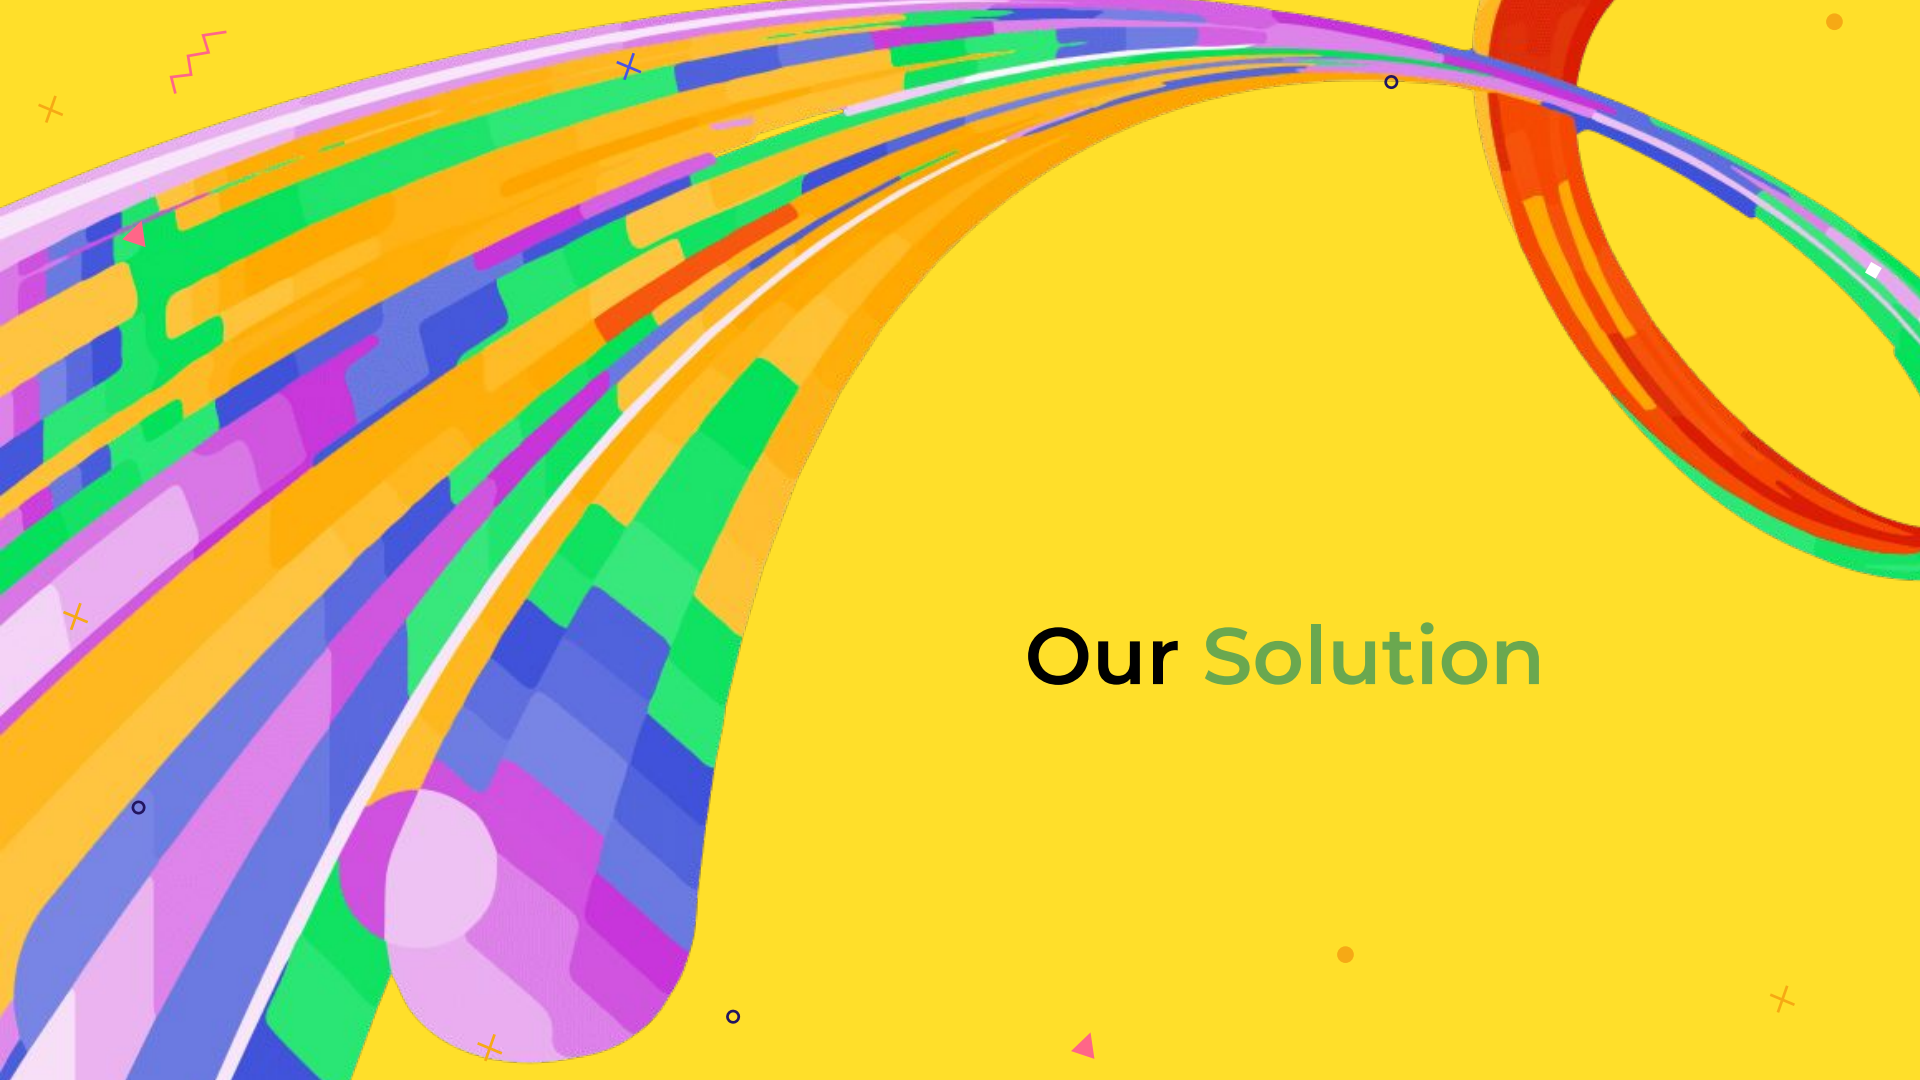

Improve what you write with ChatGPT assistance.

**04.**

## Helping Hand

Find help when you feel lost with a chatbot customized to help you.

**Our Solution**

# Why **Not Alone?**

## **Read Better by Hearing**

Electronic Device might assist reading, but some words might be difficult. This is where TTS service comes in to help out when stuck.

## **Writing with Assistance**

A STT service to help you write by speaking. If you wanna enhance the text, take help from services we provide. **All this in a single Click!**

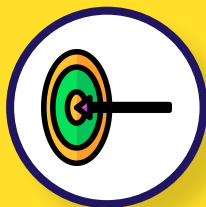

## Whisper Based STT

It often seen that people with Dyslexia use an ASR service that can help them write. **NotAlone** has a Whisper-based facility that can help them write!

## ChatGPT based Assistance

AI-based writing assistance and guidance. It provides relevant suggestions for grammar, rewriting, summarization, etc.

## TTS Service to hear what's written

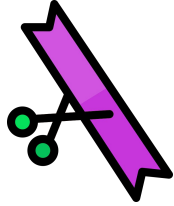

Dyslexic people often struggle on specific words with TTS they can hear the word rather than reading it.

# Tools & Features

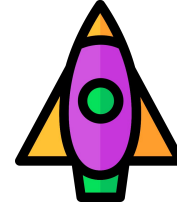

# About UI

Custom Font that caters to their visual needs.

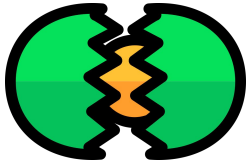

Customizable reading environment to help them read better.

Visual adjustments that helps them read easily.

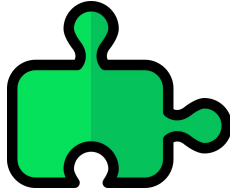

# Writing Assistance

01

## Write Anything

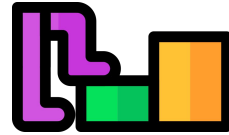

Just tell it what to write  
and it'll do so.

Want a paragraph to be  
written in a different way?

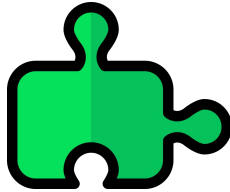

# Writing Assistance

04

## Summarize

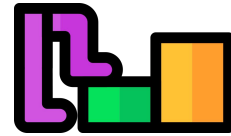

Too Long, Don't want to read. Shorten long paragraph on one click.

05

## Proxy Writer

I've something...Can you write the rest? Yes, we can!

06

## Thesaurus on go

Make me look intelligent, can you? Replace it with synonyms!

# Future Prospects

## Community Access

Providing a community to let the people interact and help each other.

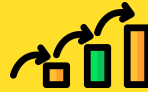

## URL based Content Summarization

Long articles are overwhelming adding adding a feature that can generate the summary of such texts could be of extreme help.

## Document Parsing

If reading on electronic display is easier then let's take everything there. We can add a feature to parse text from handwritten/printed documents.

## Access to Opportunities

A good community doesn't just people but also empower them. Something we can do by providing freelance/training opportunities to people in copywriting.

The background is a vibrant yellow with several flowing, multi-colored bands in shades of blue, green, orange, and purple. These bands have a pixelated or mosaic-like texture. There are also some geometric shapes like circles and small crosses scattered across the scene.

**Thanks !**
