PrepQuest

An AI powered app to help job seekers prepare for interviews

PrepQuest

PrepQuest uses state-of-the-art OpenAI chat GPT with custom prompts to:

a) Generate interview questions with answers on any topic

b) Create an interactive one-on-one mock interview session for students and professional to prepare for the real interview

PrepQuest

Imagine, you have 2 days to prepare for an interview in your favorite company, you don't wanna miss this opportunity but there is so much to study, so many different resources to prepare from but so little time...

Wouldn't it be great if there was something that could help you prepare for interviews in just one place.
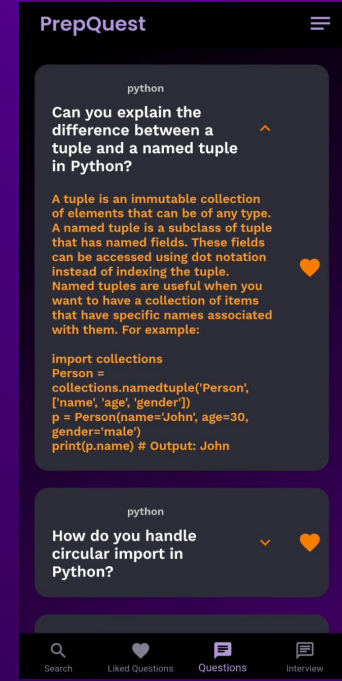

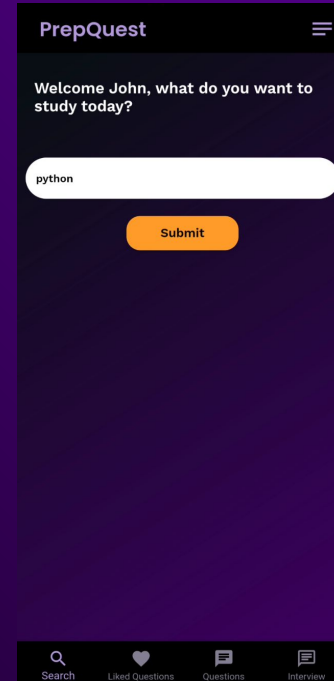

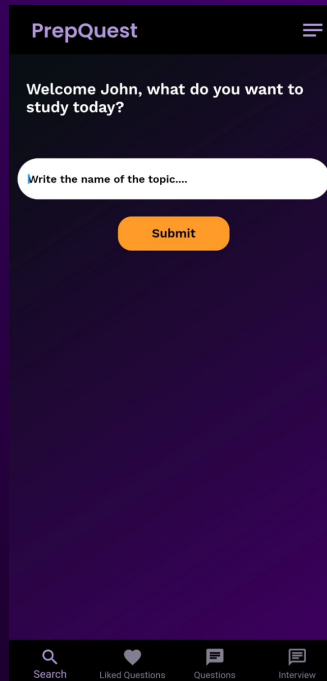

PrepQuest

Presenting, PrepQuest

Users can search interview question on any topic using this app...

AI generated questions along with answers are stored in a cloud database, so users don't have to wait for AI to generate the question every time they search

As the number of users increase, the size of database also increases

PrepQuest uses OpenAI's Chat GPT with custom prompt to generate interview questions

PrepQuest

And the saved questions are stored locally on the device and can be viewed anytime
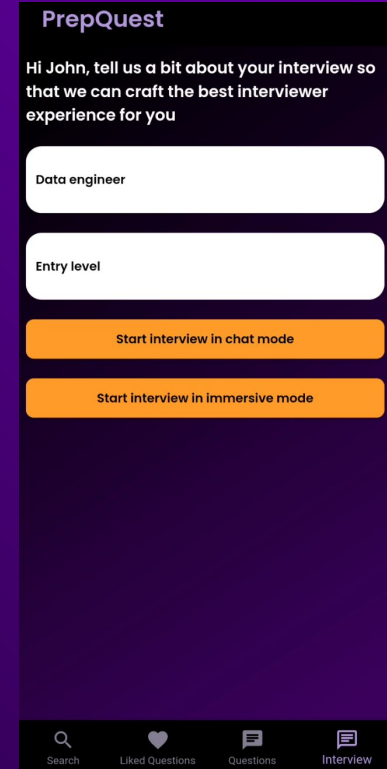

even without internet...

PrepQuest

With the help of AI, users can even have a one to one mock interview that would prepare them for the real interview, users can try the regular chat mode, or experience the immersive mode.

PrepQuest uses OpenAI's Chat GPT with custom prompts to create a tailored mock interview experience for the user.

PrepQuest

Hi John, tell us a bit about your interview so that we can craft the best interviewer experience for you

Hi, Let's start the interview

Great, thank you for joining us today. Can you start by telling us a little about your background and experience in data engineering?
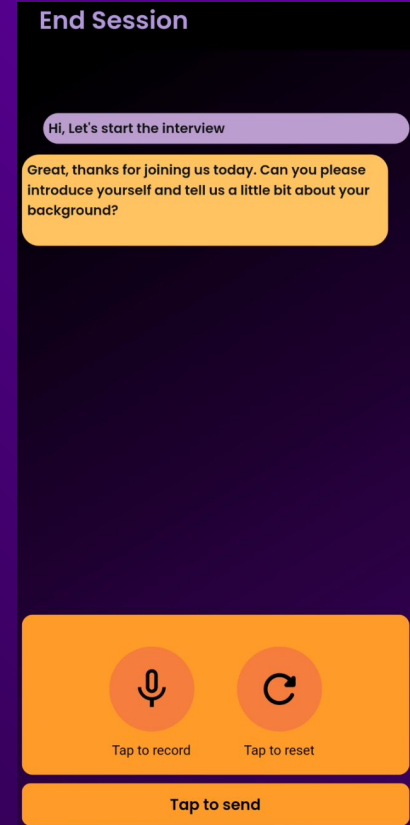

PrepQuest

Users can define what position they are applying for and what level do they want the AI interviewer questions to be. PrepQuest provides users with a completely personalized interview experience as per their requirement by using custom prompts on OpenAI's state-of-the-art Chat GPT to create a customized interviewer experience.
