

INFINIFY

JOSE CHIPANA

Introduction

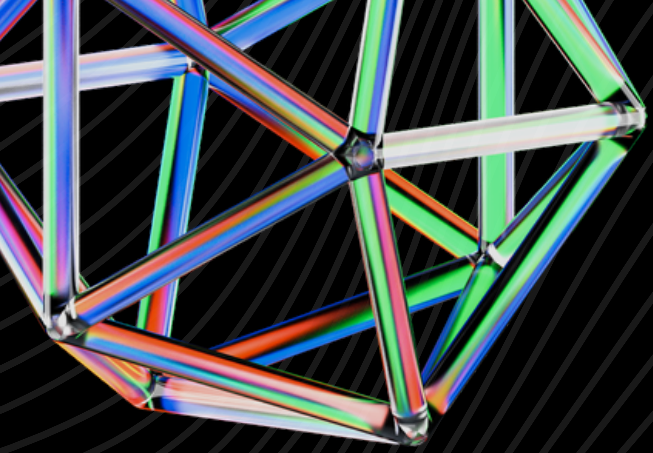

As the use of AI continues to grow, more and more businesses and individuals are looking for ways to incorporate it into their workflows. However, not everyone has the technical expertise or resources to build their own custom AI solutions from scratch

AI Automation Startup

To provide a low-code solution that allows users to easily connect different AI platforms and data sources. By leveraging pre-built integrations and customizable workflows, users can quickly build and deploy AI-powered solutions to automate tasks, streamline workflows, and gain insights from data.

Features

Easy to Use

Users can easily create and modify workflows by choosing and removing tools.

Customizable workflows

Users can customize their workflows to fit their unique needs. Cohere - AI21 Labs (Soon)

Cloud-based

You can access to your tools from anywhere.

Unlimited Workflows

Users can create unlimited of workflows.

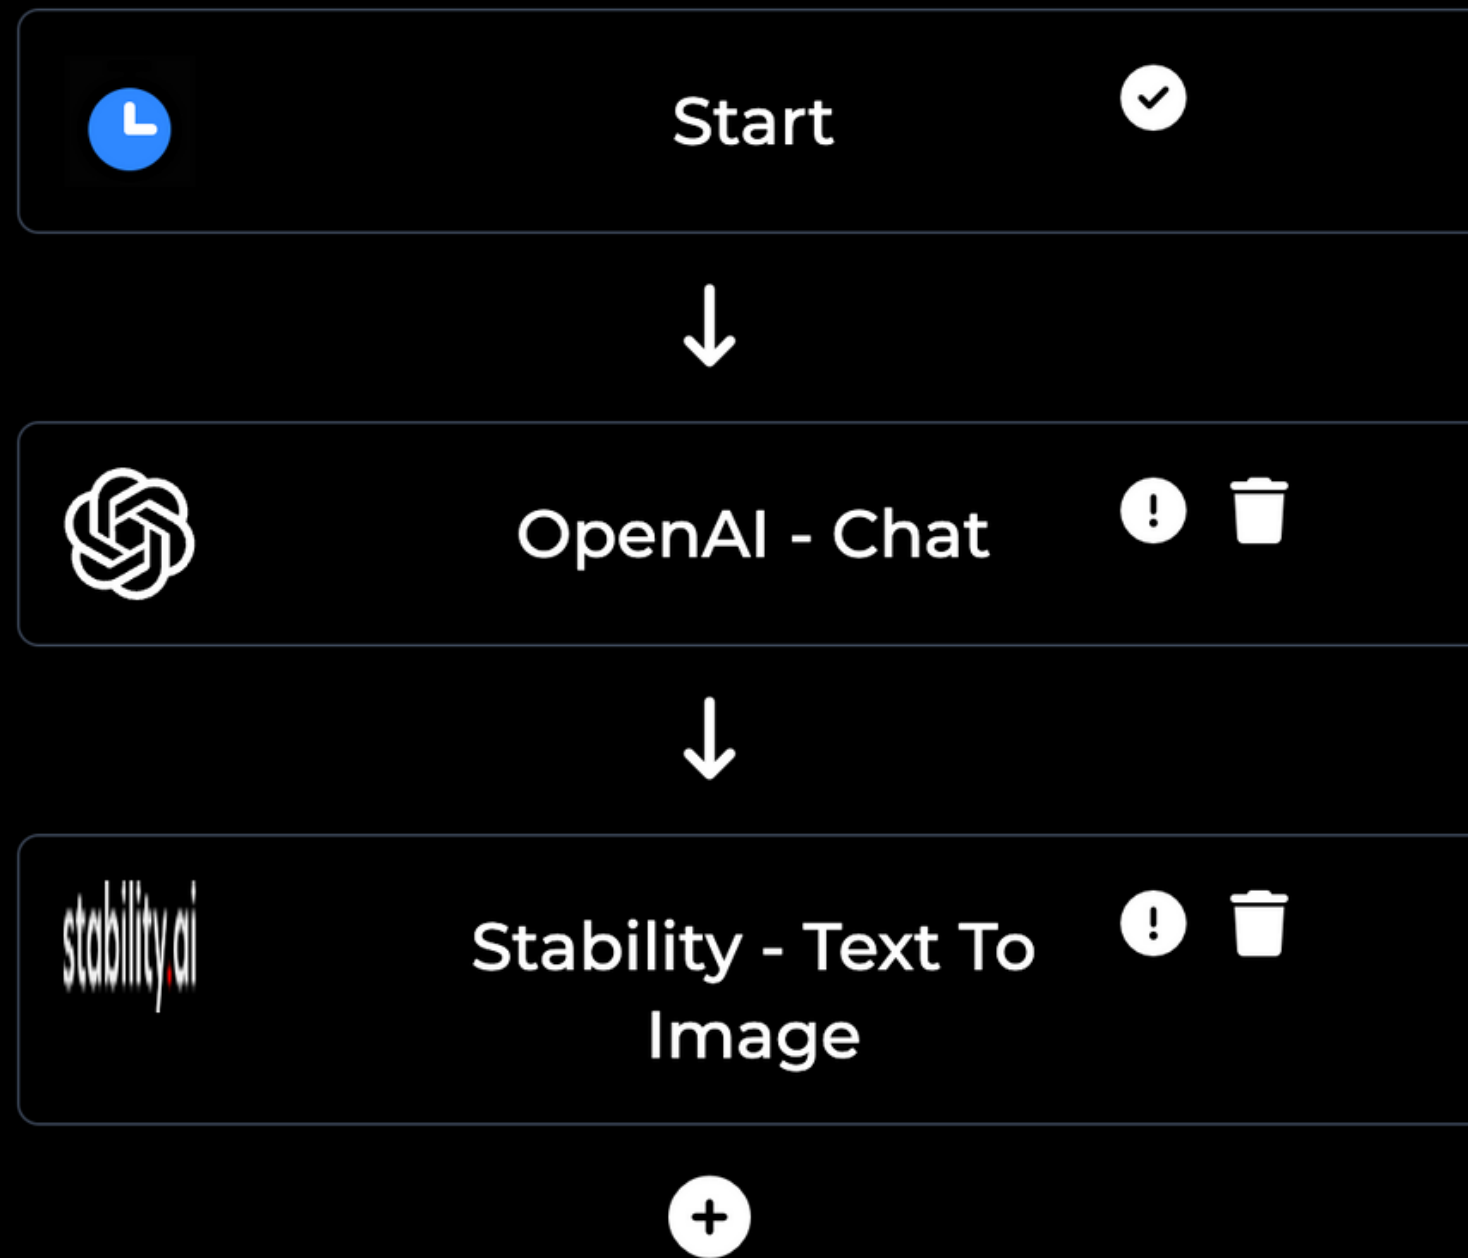

Workflow Versioning (Soon)

Infinify allows users to save and manage different versions of their workflows.

Collaboration (Soon)

nfinify includes collaboration tools that allow users to share their workflows with team members.

AI Workflow

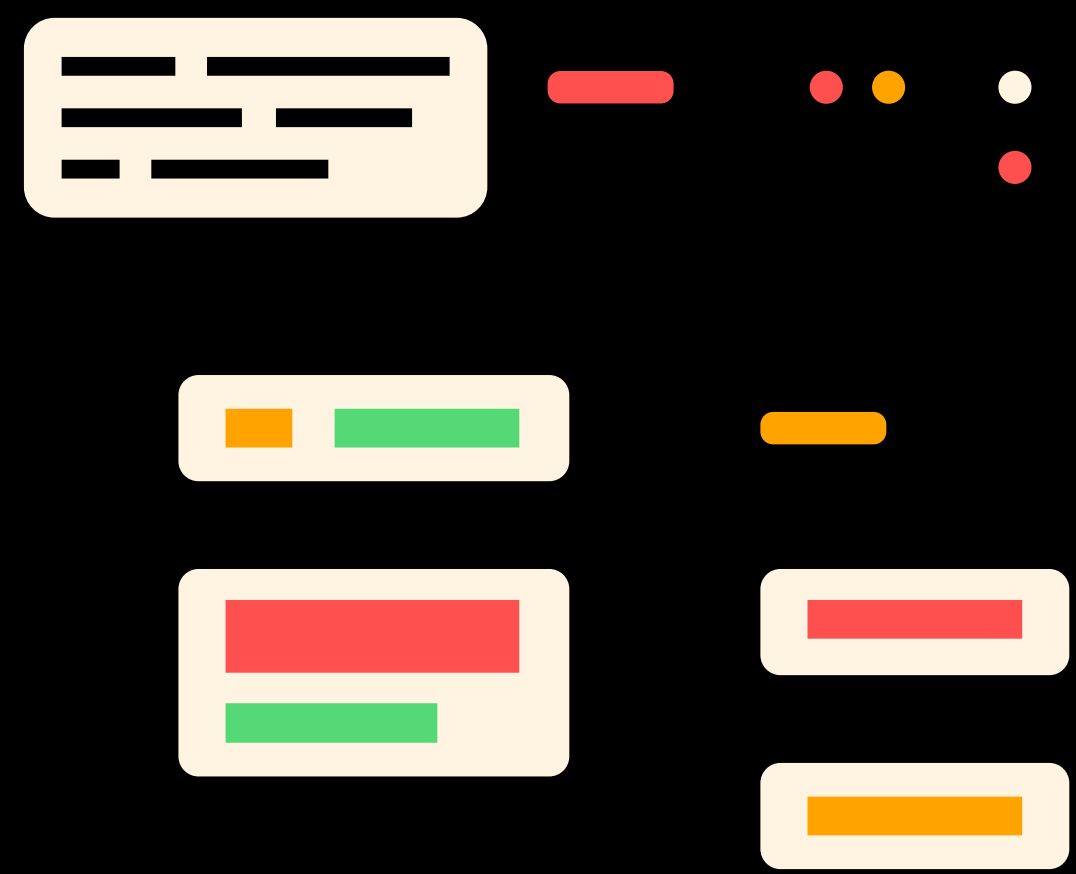

The MVP of our startup will be a user-friendly platform that enables individuals and businesses to create their own AI workflows with ease, without requiring any knowledge of coding or programming.

Initially, Infinify will offer support for ChatGPT, Stability, and AI21 labs, but over time, we plan to expand the platform to include support for additional AI tools and integrations.

Research Market

\$190
billions

hat the low-code market will grow to
more than \$190 billion by 2025
