# Tale Craft

Nattapat Sukpootanan
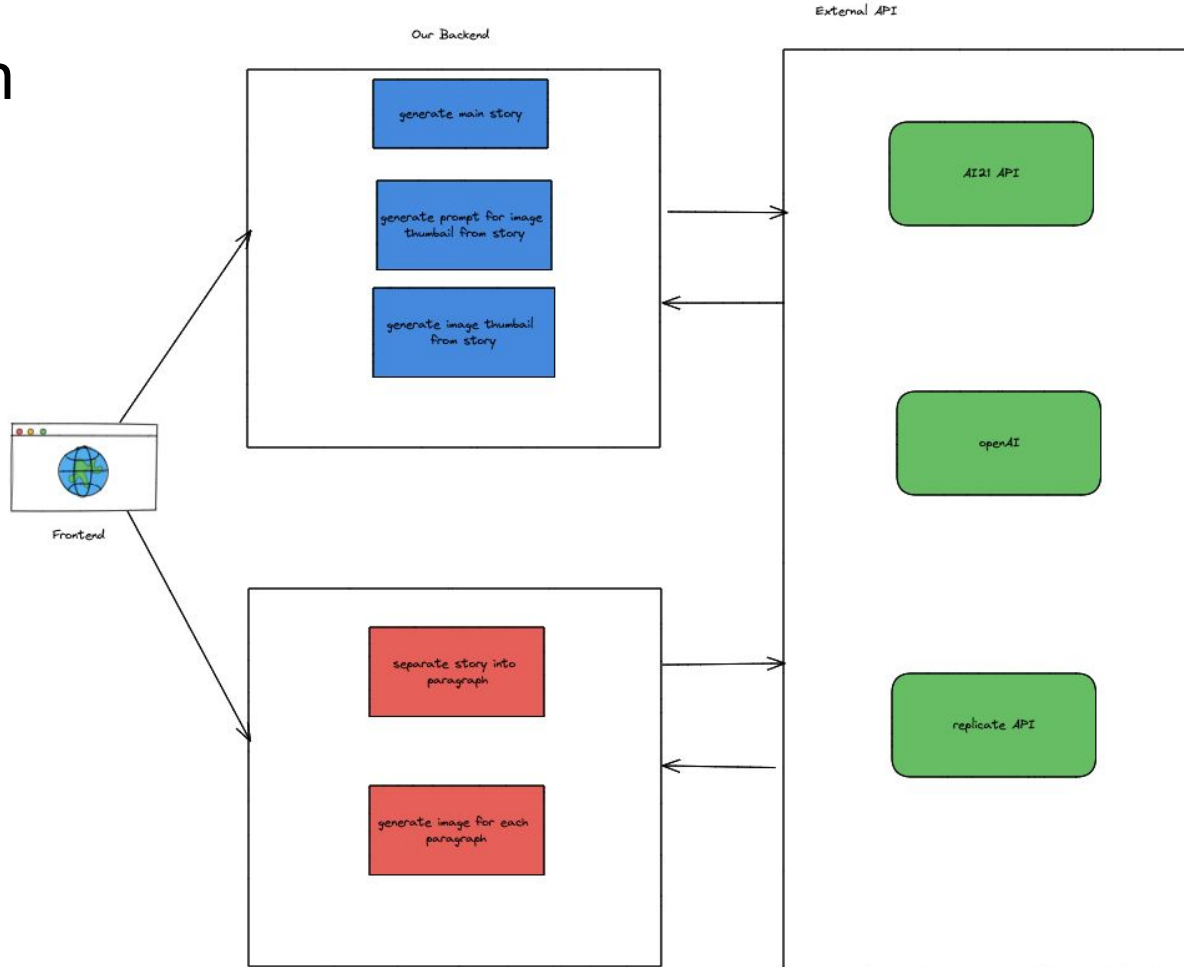

Piromsurang Rungserichai

Problem

- Creating children's tales or books involves complex and time-consuming processes, including story development and illustration.

- Generating effective story prompts for AI to create stories and images requires expertise in both writing and drawing, which can be challenging for many creators.

Solution

- Our application generates stories and images based on user-inputted text.

- Users can easily create and share their own stories using our application.

Approach

generate main story

generate prompt for image thumbail from story

generate image thumbail from story

Frontend

AI21 API

openAI

separate story into paragraph

generate image for each paragraph

replicate API

DEMO 👨‍💻

Future plan

- Export Story to PDF
- Improve image generation
- Make video from prompt

Thank you so much 🤗
