

# Groove.ai

Grooves and Rhythms generated by AI

Manikant Kella

## Inspiration

- Always felt music soothes me!! So, thought why can't AI generate music Rhythms, Drums and Grooves. That's where groove.ai came with the help of A21 J2-Grande-Instruct model.

## App

- Welcome to our cutting-edge groove.ai app, an revolutionary app that will change the way we experience music! With the help of AI21 J2-Grande-Instruct AI model, I was able to create a unique platform that combines the power of rhythms, drums, and music to produce an unparalleled audio experience.
  - Our app is designed to seamlessly integrate the complexity of AI-generated sounds with the simplicity of user-friendly interface, enabling anyone to create their own music without any prior experience or expertise. By harnessing the power of LLM's, we have created an app that is not only intuitive but also highly intelligent, capable of adapting to the user's preferences and producing music that is tailored to their individual tastes.
  - Whether you are a music enthusiast or a seasoned musician, our app will surely impress you with its ability to generate intricate and diverse rhythms, beats, and melodies. So come and play with the musical innovation of groove.ai and be a part of the future of music-making!
-
