Consulting Trainer

https://nescampos-consulting-trainer-app-r3ba9k.streamlit.app/

Trainer for junior consultants in customer interview processes.

Problems with trainings

Busy seniors

Those who can/should train the new consultants do not have the time as they are in other projects.

Deprecated methods

Current teaching methods are not effective when it comes to interacting with other people-

Consulting Trainer

Automatic dialog generation - Simulator

Facilitates the teaching process on required interviews with clients, simulating a conversation and showing the queries that the consultant should make.

Consulting Trainer

Due to resource issues, this initial version (alpha) generates each text every 21 seconds.

The project is about

A web app for tracking data sensors in a mining

The role of my counterpart is

Chief of operations

My role is

Web developer

```
Me (Web developer):

Hello, Chief of Operations. Can you tell me more about the mining sensor data web ap

Customer (Chief of operations):

Certainly! The mining sensor data web app project aims to create a web application t

Me (Web developer):

Thank you for the information. What are the specific goals for the first phase of th

Customer (Chief of operations):

The specific goals for the first phase of the project are to:
1. Identify the types of sensors that will be used in the mining site.
2. Develop a data collection plan and establish a data pipeline from the sensors to
3. Create a prototype of the web app that can display real-time sensor data.
4. Test the prototype with a small group of users and gather feedback for improvemen

Me (Web developer):

Thank you for the details. What is the timeline for the first phase of the project?
```

How works?

User (consultant) enters the type of project about which the interview will be discussed, the role of the counterpart with whom he/she will interact and his/her role.

It processes the user's information, generates the activity sequence and through LangChain and CAMEL it begins to generate the dialog that the user should understand and apply in real life.

Start printing the dialog on the screen, starting with the consultant's questions and the client's answers.

Technologies: LangChain, CAMEL, Streamlit, OpenAI

Business model

Model

Plans that include credits for each conversation.

Cost

Plans that would start from US$5/month.

Users

Consultants, auditors and companies that carry out interview processes and need to train their staff.

Competitors

Coaching programs, online tutorials, and training books or manuals.

Differentiation

- More applied teaching through simulation.

- Generation of specific questions according to roles and type of project.

- Simplicity of use and better use of the user's time.

Talent

Néstor Campos

Founder/Technical Manager

+13 years working in many technologies products/companies (Web3, AI, Big Data, and more).

nescampos

Microsoft MVP (Artificial Intelligence)

AWS Community Builder (Machine Learning)

Alibaba Cloud MVP (Big Data)

Status and evolution

Status

2023
Proof of concept launched.

2023 (end of the year)
Release of a functional version, with user management, usage plans and more.

Thank you
