

Professional Translator

Our hackathon project aims to develop a translator with an advanced understanding of professional knowledge by leveraging the in-context learning capability of a large language model and employing semantic search techniques for knowledge acquisition.

Project Description

The Concept

We created a platform to provide accurate and in-depth translations with a deep understanding of professional knowledge.

The Audience

Our target audience is office users who want to further develop their skills, share their knowledge, and connect with others.

The Design

The platform is designed to be user-friendly and interactive, with a sleek and modern interface that encourages creativity.
