TELEGRAM CHAT SUMMARIZE

INTRODUCTION

- Python application to summarize Telegram group chats
- Generates daily summarizations using Claude or GPT model
- Uses Telegram Bot API to access chat history

FEATURES

- Summarizes Telegram group chat
    - Benefit from claude 100K token support, we do not need to build the tools with any vector database
- Generates daily summarizations of specific chat
- Uses Claude or GPT model for summarization

TODO

- Allows setting of the summarization time
- Allow different user to interact the bot instead of only developer
- Add menu for bot

INSTALLATION STEPS

1. Clone repository to local machine.
2. Install Python 3.x and pip.
3. Run `pip install -r requirements.txt` in terminal.
