# PROBLEM STATEMENT

- Overwhelming Information: Information overload on the web creating consumer paralysis.
- Subjectivity and bias: Challenges in filtering out subjective opinions and biases when assessing product reviews and recommendations.
- Apples-to-oranges comparisons: Difficulty in comparing products that serve different purposes or cater to different needs, making it challenging to make informed decisions.

### SOLUTION

### **UNBIASED COMPARISONS OVERCOMING LIMITATIONS** BY AI POWER.

#### **Comparison Insight**

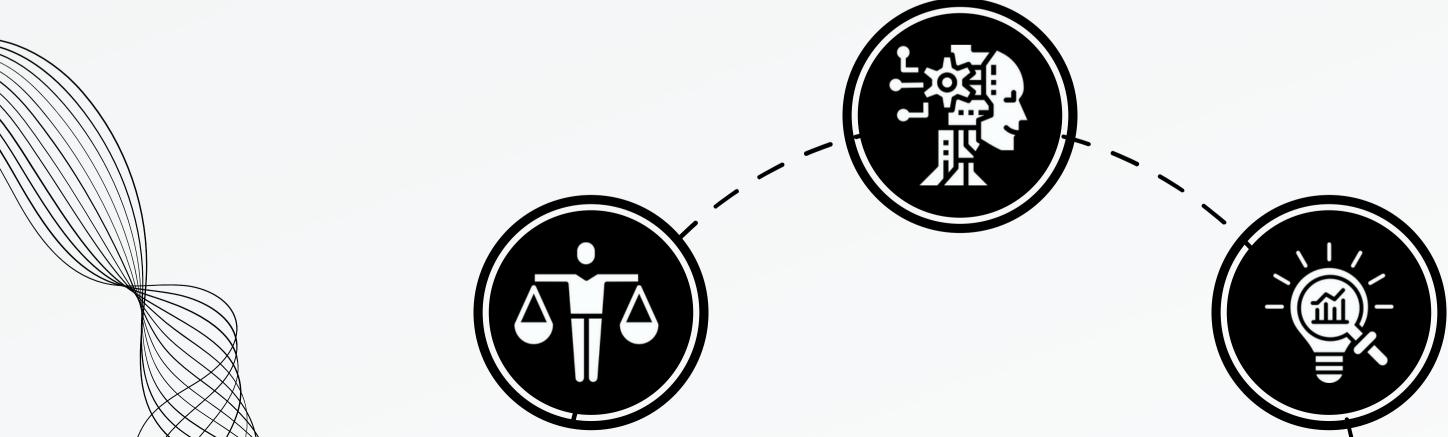

Transforming big data into insightful information that are concise and easy to digest.

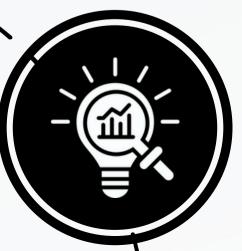

#### **Consider Budget**

Streamlining decision-making by considering budget as a key factor for easier comparisons.

#### **Condition Specify**

Tailoring comparisons to user-specific conditions for more personalized decision-making.
