PROBLEM / CHALLANGES

Pain Points:

- *Identifying competitive market salary to win top talents and to avoid candidate retention rate.*

- Repetitive manual process like "analysing interviews" and "creating feedback evaluation summaries" waste valuable time and exposes risk to bias.

- Biased hiring leads to reduced innovation, diversity of thought, and perspective.

- *The lack of applicants are mainly due to copy-pasted and poorly engaging job description.*

OPPORTUNITY

- *Reduce HR expenses trough accurate competitive salary prediction*

- *improve candidate engagement and brand awareness by generated personalised interview scripts and job descriptions*

- *Eliminate manual steps and automate evaluation process to increase productivity*

- *Reduce bias via AI candidate evaluation*

- *AI generated engaging and structure interviews scripts increase candidate brand awareness.*

WE USE

BABY AGI

WHIPSER

SOLUTION

BABY AGI

WHIPSER

OPEN AI

We leverage BABY AGI to conduct a salary benchmark exercise, utilizing external sources and considering enterprise peer benchmarks to determine a competitive salary.

We use Whisper to transcribe interviews. The transcriptions are then analyzed by our AI to automatically generate a detailed candidate feedback report. With one-click the recruiter decides to pass the report to the manager for approval

Our AI Agent generates personalized interview scripts, ensuring that each candidate's unique attributes are taken into account during the interview process. It also covers some field related questions and expected responses.
