Quick Intro

- Dzulkiflee Taib / GoldZulu

- Startup Founder of Metagineers, leveraging tools and AI agents to help give you or your company the competitive advantage

- AWS Community Builder (4th Year)

- Evangelising AI to Students Typically Teenage Girls

Thought Process

How do we create a tool that people want to use everyday Monday to Sunday?

Taking a look at the existing App at Monday.com Marketplace and see what are the successful ones

Taking a look at existing apps such as Mem a note taking app and how it uses AI to enhance it's usefulness

Challenges

There are so many things you can do with AI → Which specific applications should I build for? → Short period of time to show case the potential ↓ App should be able to provide the means to a solution but not the solution itself ← Promote flexibility and extensibility

Ultimate Goal

Have someone use the Monday.com app in a way that I have never dreamt possible!
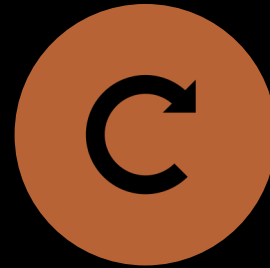

Introducing AI ToolBox
4 Main Action Categories

GENERATE   TRANSFORM   UPDATE   QUERY

One More Thing...

- Utilises AI Execution Agents Technology

- Agents can select from the numerous tools that exist now and in the future!

- New Tools introduced regularly

- Users can mix and match tools to empower their agents

- E.g. Web Search Tool, Calculator Tool as shown in the submission app

- Even tools that connect to other eco system like Zapier NLU!

Tools Galore (potentially)

- Database Query Tool
- Speech Synthesis Tool
- Emailing Tool
- Image Generation Tool
- Calling Tool
- SMS Tool
- BlockChain and Crypto Tools
- ...

Thank You

- Enjoy Playing Around With the AI Toolbox!
