Turn your bugs into content

The Problem

Content creation is a big part of every business' Marketing strategy, but it often feels uninspired, unrelatable and lacking authenticity.

According to a recent survey by Hootsuite and We Are Social, the average business allocates around **24%** of its marketing budget to social media, with a majority of the companies surveyed spending between 11% and 50% of their total marketing budget on social media marketing.

The Solution

Backlogs, bugs and minor struggles are a gold mine of content for marketing.

- Infinite source of content
- Turn your brand story into an adventure
- Be more authentic and relatable

Recyclai automatically turns your problem descriptions (bugs) into shareable content.
