MondayVox

By: LENS Corporation

Problem Statement

- Traditional methods of input: Time-consuming and Cumbersome.

- Ex. A person driving or cooking.

- Era of Voice controlled things.

- We identified a need to develop a voice-controlled bot that can manage

  your Monday board and enhance the productivity on Monday.com.
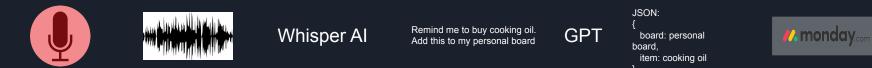

Solution Overview

- MondayVox can efficiently create, update and delete items from a board on Monday.com.

- By leveraging voice recognition technology, we aim to provide a more intuitive and user friendly interface.

- With the help of LLMs, the user can give commands in conversational style.

Future Works

- Presently, we support 4 types of columns: status, priority, date and text. In future, we can add more data types.

- Add these functionalities to docs as well.

- Make the entire system more interactive.
