# TeleAssist

Telegram Bot for Scheduling Messages and AI-aided Personalization

Concept

- A Telegram bot that enables users to schedule message delivery to a designated recipient and employs AI for creating suitable prompts based on the message description.

Benefits

- Facilitates efficient communication across different time zones and offers the ability to plan ahead. Enhances personalized messaging through AI integration.

AI Integration

- Integrated with ChatGPT to generate context-aware and engaging prompts, aiding in crafting better, creative messages.

Conclusion

- TeleAssist aims to revolutionize digital communication by merging efficient scheduling and the power of AI.
