DocBuilder AI

THE AI WAY TO WRITE A DOC

Alayof Digital

snir@alayofdigital.com

The problem with writing docs..

Time

Preparing doc is often a long process that requires a significant time investment

Writer's Block

Due to the complexity and effort involved in creating a doc, many people tend to delay starting the process

Messy Workflow

With traditional methods, writing a work doc requires multiple tools, the information must be manually transferred to project management tools, creating an additional step

Current Solutions

ChatGPT

Users use chat gpt to help with their docs. However, it requires a lot of copy & paste, bouncing between 2 apps, organizing and formatting the data.

Single Prompts

Single prompts lack deeper context which limit creativity result in "meh" outputs.
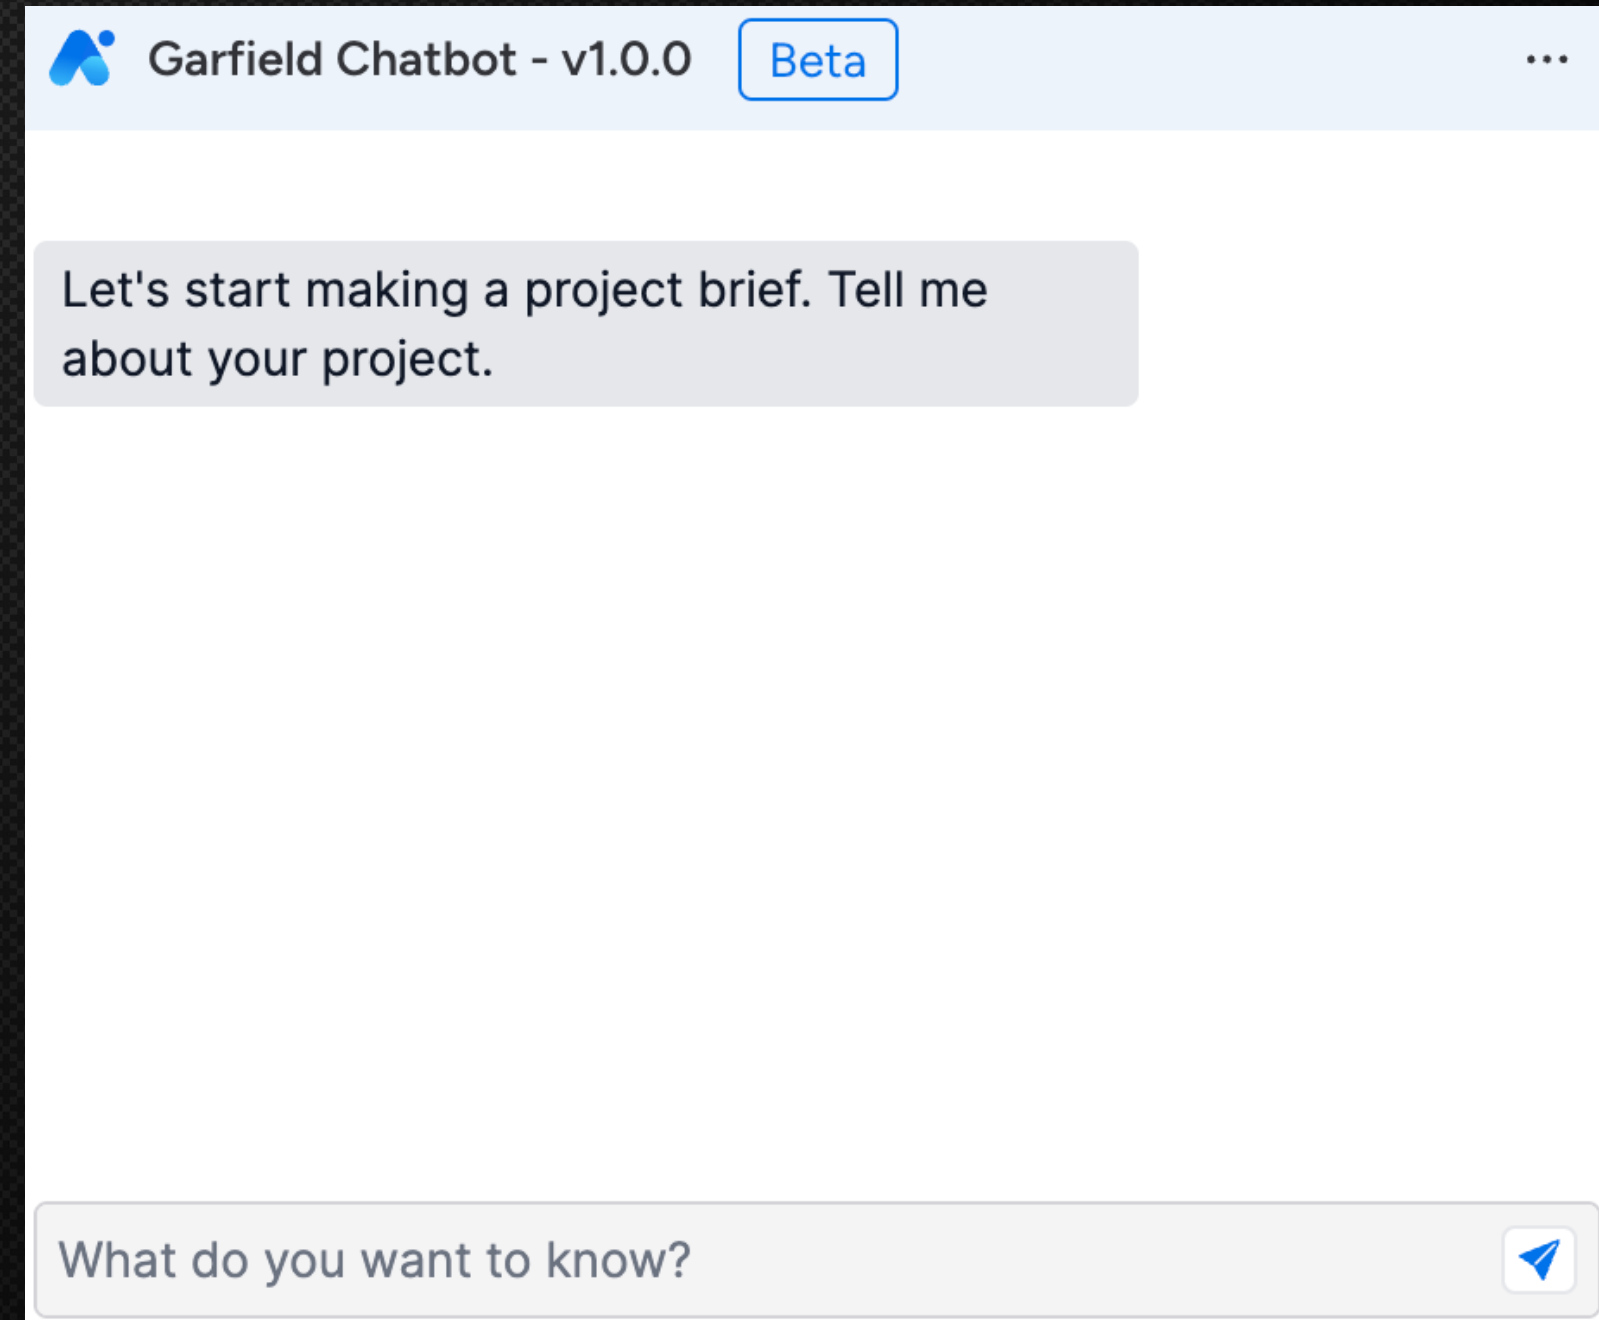

"sit down and write it down" method

Just push through the pain and get to work. This energy-draining method that is commonly used.

Our Solution- DocBuilder AI

The interactive chatbot that interviews you and building a customized doc for you online

Garfield Chatbot - v1.0.0 Beta ...

Let's start making a project brief. Tell me about your project.

What do you want to know?

How it Works

Let's start making a project brief. Tell me about your project.

What do you want to know?

DocBuilder starts with bite-size questions to gather the relevant information your doc needs

How it Works

Tell DocBuilder to make a suggestion, and it will generate ideas based on the chat you had so far!

The Result

Project Brief ☆

AI App for Monday.com

Objective

The goal of this project is to develop an AI-powered app that enhances the functionality of monda improving task automation, deadline prediction, priority management, team collaboration, resourc and performance analytics.

Features and Functionalities:

1. **Task Automation:** Automatically assign tasks to team members based on their workload, s availability to ensure efficient task distribution.

2. **Deadline Prediction:** Predict deadlines for tasks and projects using historical data and curre enabling better time management and planning.

Generate a Doc in minutes (not hours) that you can present to employees, stakeholders and clients!

Target Market

Who is it for?

Project Managers

Build briefs in minutes, not hours, and share with your manager, clients and team members

Product Owners

Use DocBuilder to spark product features and share with your team

Future Roadmap

Live chat-to-doc experience

Watch your doc being written & formatted in front of your eyes while you chat with DocBuilder
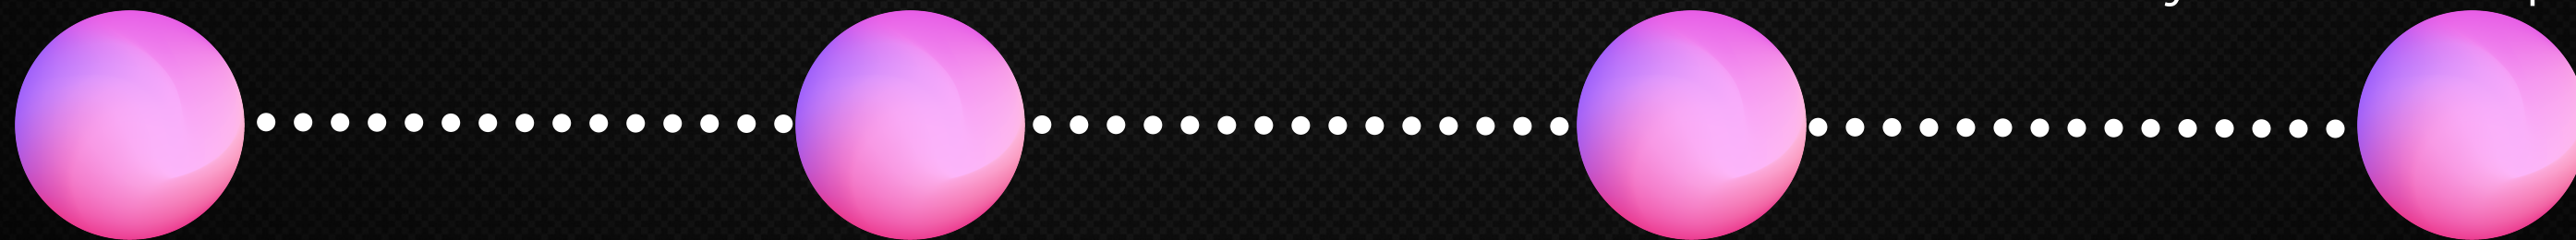

Keyboard Shortcuts

Smooth chat 2 doc experience withhout using mouse pad

Context Memory

Reopen previous chats and use the same context to generate more docs

AI CRM-Builder & BoardBuilder

Chat to setup your boards, CRM and databases with apps, automations and columns, customized to your ultra-unique needs
