

# Work Assistant

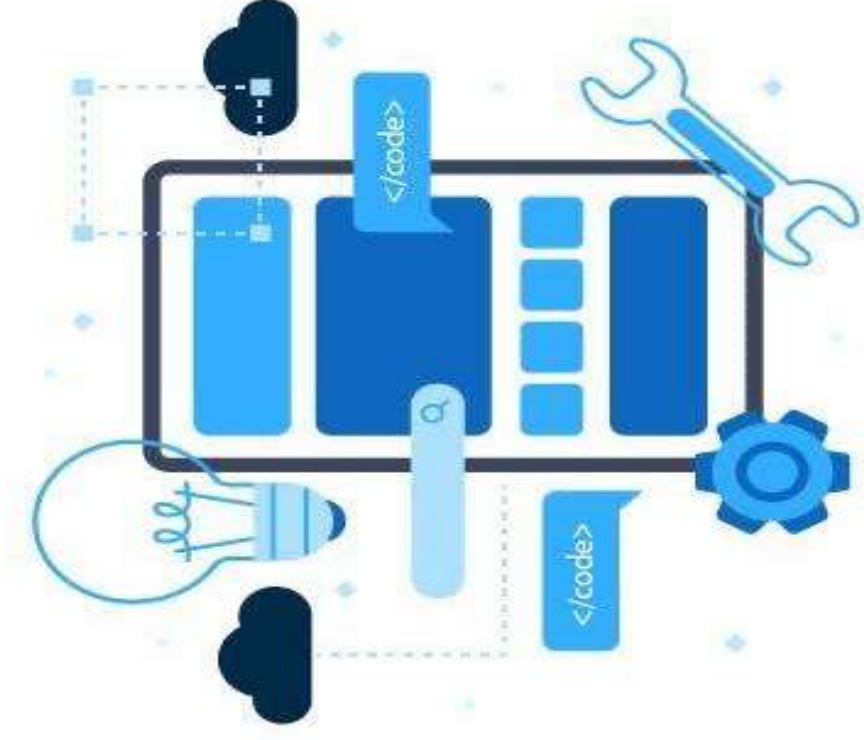

The most painstaking part of development is bugs. Mostly during software development the projects get delayed and sometime gets struct due to errors i.e. bugs.

In monday.com at developer board there is board for bugs which fixes your code bugs

Thus in order to assist them our AI came to rescue

Thus our feature provide instant code fixes and recommendations to solve your bug.

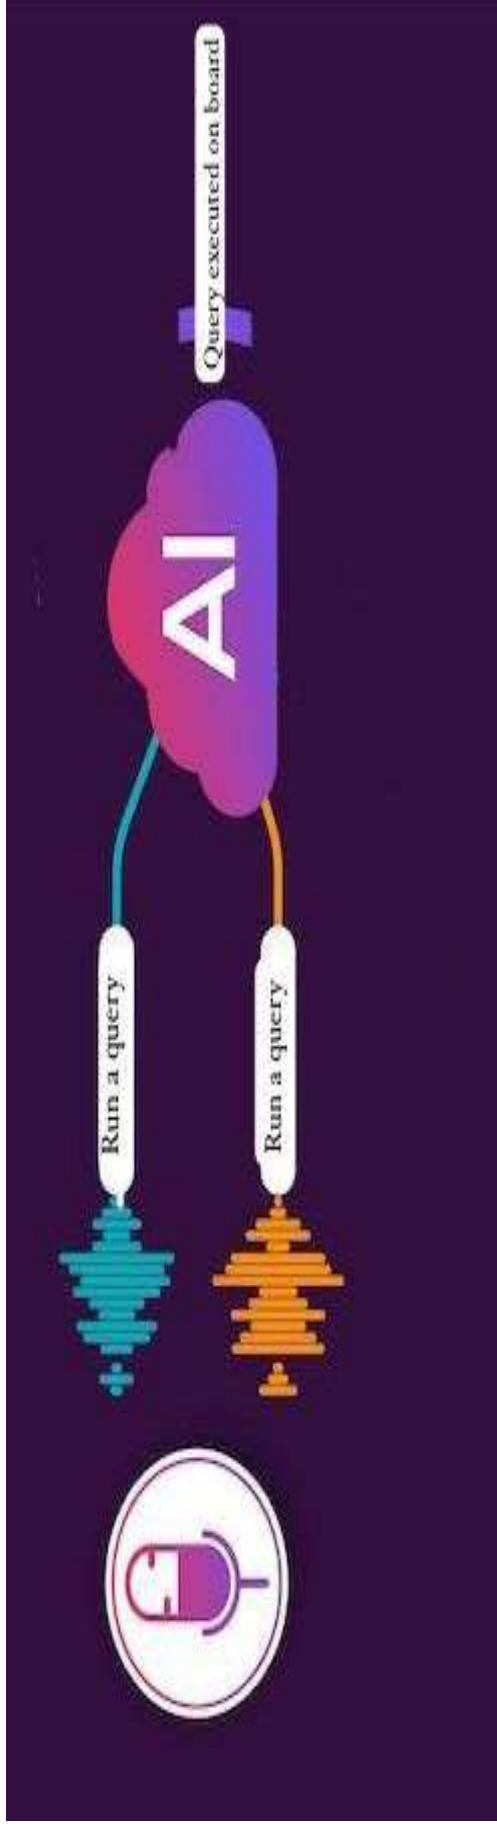

We live in really fast world .  
In order to cope up we need to be multitasking.

Most of the time we don't have our laptops to create boards or  
modify them and it's really hard to deal with tables on small  
screen.

Here comes to rescue-  
your own voice assistant

Voice assistant provides us the ability to talk to our tables

Voice assistant takes instructions from your voice in English and apply them on boards in real time.

Don't worry voice assistant won't judge your accent.

And VOILA your board has been modified on a single command !!!

# Business Model of Work Assistant
